

Container Infrastructure Optimization & Management Suite

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Container Infrastructure Optimization & Management Suite

Service Description

A comprehensive consulting and implementation service for organizations seeking to optimize, secure, and manage their containerized computing environments at scale.

Features

- End-to-end container infrastructure assessment and architecture design
- Enterprise-grade deployment and orchestration of container platforms
- Automated lifecycle management for containers and supporting infrastructure
- Integrated monitoring, logging, and performance analytics solutions
- Security hardening and policy enforcement across container environments
- Unified management of multi-cloud and hybrid container workloads
- Data protection, backup, and disaster recovery for containerized assets
- Resource optimization, scaling strategies, and cost governance
- Custom automation for CI/CD pipelines and DevOps enablement
- Change management, training, and seamless organizational adoption support

Benefits

- Accelerates innovation by enabling rapid, reliable application delivery
- Reduces operational overhead through automation and best practices
- Boosts security posture with continuous compliance and controls
- Enhances visibility into resource consumption and container health
- Improves scalability for fluctuating business and technical needs
- Strengthens resilience via robust backup and recovery protocols
- Ensures optimal use of infrastructure, lowering total cost of ownership
- Facilitates multi-cloud and on-premise hybrid strategies with ease
- Empowers teams with expert-led training and adoption programs
- Delivers measurable ROI and future-ready containerization roadmap

Constraints

Requires modernized infrastructure and stakeholder alignment; cloud access may be needed.
