

Cloud Business Intelligence Enablement

G Cloud 15 - LOT1A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Cloud Business Intelligence Enablement

Service Description

Transform business operations with PaaS-powered analytics and BI tailored for enterprises seeking data-driven decisions, enhanced governance, and scalable insights.

Features

- Seamless integration of cloud-native BI platforms into existing environments
- Custom dashboards and real-time reporting for actionable business insights
- Automated data ingestion from multiple structured and unstructured sources
- Self-service analytics capabilities for business and technical users
- Advanced data modelling and visualization tools
- Robust role-based access and governance for sensitive analytics
- Scalable, highly available PaaS infrastructure management
- Comprehensive solution architecture designed for rapid deployment
- End-to-end user training and adoption programs
- Continuous optimisation and support for ongoing BI enhancement

Benefits

- Faster, data-driven decision-making throughout the organization
- Reduced IT overhead with managed PaaS analytics platforms
- Enhanced collaboration via self-service BI and shared insights
- Improved business agility with real-time, customizable reporting
- Enterprise-grade data security and compliance controls
- Reduced time-to-value for analytics solutions and projects
- Scalable platform adapts to evolving business requirements
- Empowered users through targeted training and support
- Lower total cost of ownership compared to legacy BI systems
- Continuous improvement through proactive optimisation and best practices

Constraints

Requires modern, cloud-compatible data sources and user stakeholder engagement.
