

Intelligent Workload Automation & Optimization Consulting

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Intelligent Workload Automation & Optimization Consulting

Service Description

Expert-driven automation of IT workloads for enterprises seeking peak efficiency, reliability, and proactive system management.

Features

- In-depth analysis of current workload distribution and management practices
- Custom automation blueprint to streamline repetitive IT tasks
- Integration with existing ITSM and infrastructure management tools
- Development and deployment of policy-driven workload automation scripts
- Continuous monitoring and alerting for workload performance bottlenecks
- Proactive configuration drift detection and remediation solutions
- Role-based access controls for automation deployment and management
- Scheduled and triggered automation flows for critical system tasks
- Resilient rollback plans and recovery automations for workload failures
- Comprehensive training for IT teams on workload automation best practices

Benefits

- Boosts IT team productivity by minimizing manual intervention
- Reduces risk of human error in configuration and operations
- Accelerates deployment timelines for new workloads and services
- Enhances system uptime through automated self-healing routines
- Optimizes resource consumption for cost-effective infrastructure
- Ensures consistent compliance with configuration policies
- Enables rapid response to incidents with automated remediation
- Integrates seamlessly with hybrid and on-premises environments
- Provides clear reporting and auditing of all automated actions
- Empowers IT staff with automation skills for future-proof operations

Constraints

Requires accurate system documentation; custom integration may need stakeholder input.
