

Collaborative Product Data Management Excellence Program

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Collaborative Product Data Management Excellence Program

Service Description

A consultancy-led service to streamline and secure product data workflows for engineering teams, accelerating innovation and collaboration across the product lifecycle.

Features

- Comprehensive assessment of current product data management practices
- Customised roadmap for collaborative data workflow optimisation
- Design and implementation of secure, centralised data repositories
- Integration of engineering tools for seamless data sharing
- Automated version control for product documentation and CAD files
- User access management aligning with engineering roles and permissions
- Data governance framework to ensure compliance and quality
- Training programs to drive user adoption and process changes
- Analytics dashboards for real-time insight into data usage and productivity
- Ongoing technical support and continuous improvement consultations

Benefits

- Accelerates product development cycles through improved data accessibility
- Boosts cross-team collaboration and reduces information silos
- Minimises costly rework with robust version control
- Enhances IP protection and data security for engineering assets
- Supports regulatory compliance with auditable data workflows
- Improves decision-making with actionable data usage analytics
- Reduces operational inefficiencies through automation
- Facilitates faster onboarding of engineering staff
- Futureproofs data management practices to scale with the business
- Drives cultural change for sustained collaborative engineering excellence

Constraints

Requires existing digital engineering tools and stakeholder commitment to process change.
