

Cloud Volume Performance Assurance

G Cloud 15 - LOT3

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Cloud Volume Performance Assurance

Service Description

A premium service for enterprises seeking robust validation of cloud system performance under high-volume scenarios, ensuring scalability and resilience ahead of business-critical launches.

Features

- End-to-end volume test scenario design and execution
- Automated cloud-based workload simulation at scale
- Bespoke data modeling for realistic transaction peaks
- Advanced monitoring of system throughput and latency
- Bottleneck identification across distributed cloud resources
- Comprehensive reporting with actionable improvement plans
- Integration with continuous deployment and CI pipelines
- Expert recommendations for performance tuning and scaling
- Cross-platform compatibility testing for hybrid environments
- Stakeholder workshops to align technical and business goals

Benefits

- Mitigate risk of system outage during peak demand periods
- Validate cloud scalability before business growth initiatives
- Gain data-driven insights into system limitations
- Accelerate issue resolution with expert diagnostic support
- Reduce IT operational costs via proactive performance tuning
- Enhance customer satisfaction through seamless service delivery
- Support compliance with uptime and SLA commitments
- Increase confidence in cloud migration and transformation projects
- Enable agile improvements by integrating test results into DevOps
- Empower IT and business teams with clear, non-technical reports

Constraints

Requires access to target cloud environments and test data; excludes end-user training and custom code fixes.
