

Cloud-Native Application Protection Strategy & Enablement

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Cloud-Native Application Protection Strategy & Enablement

Service Description

A premium consultancy for enterprises transforming security in cloud-native environments, delivering robust application protection, compliance, and operational confidence through tailored advisory and deployment services.

Features

- Comprehensive assessment of cloud application security posture
- Threat modeling for modern, distributed cloud architectures
- Deployment of automated, policy-driven protection controls
- Integration with CI/CD pipelines for secure development
- Continuous monitoring for vulnerabilities and threats
- Zero Trust framework alignment and implementation
- Compliance mapping against regulatory standards
- Incident response planning and readiness exercises
- Role-based access and identity policy optimization
- Detailed reporting and executive security dashboards

Benefits

- Accelerates secure cloud adoption with minimal disruption
- Reduces risk of breaches in complex cloud environments
- Drives continuous compliance with evolving regulations
- Enables proactive detection and swift response to threats
- Improves developer productivity with embedded security guardrails
- Enhances stakeholder confidence through transparent reporting
- Aligns cloud security with business and IT strategy
- Future-proofs investments against emerging attack vectors
- Fosters a culture of security-by-design in DevOps teams
- Optimizes resource allocation by automating protection tasks

Constraints

Requires API access to cloud platforms and cooperation from DevOps and IT security teams.
