

Engineering Support Application Optimisation Consulting

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Engineering Support Application Optimisation Consulting

Service Description

Expert assessment and optimisation of engineering support applications for enterprises seeking improved performance, usability, and reliability across their engineering operations.

Features

- Comprehensive audit of current engineering support applications portfolio
- Performance benchmarking against industry best practices
- User experience evaluation and workflow streamlining
- Application interoperability assessment and integration recommendations
- Security and compliance gap analysis for engineering environments
- Custom roadmap for application modernisation or replacement
- Cost-benefit analysis and ROI modelling for optimisation initiatives
- Stakeholder engagement and adoption change management guidance
- Vendor-neutral technology recommendations tailored to enterprise needs
- Ongoing performance monitoring strategy and reporting setup

Benefits

- Boost engineering productivity through optimised application workflows
- Reduce operational bottlenecks and downtime for critical support processes
- Enhance end-user satisfaction and application adoption rates
- Lower total cost of ownership via targeted optimisation
- Increase system interoperability within engineering toolchains
- Strengthen security posture and regulatory compliance adherence
- Accelerate time-to-value for new engineering initiatives
- Gain clear visibility over application assets and dependencies
- Receive actionable insights for technology investment decisions
- Empower teams with measurable and sustained performance improvements

Constraints

Requires active client participation and access to current application environments.
