

AI-Driven Anomaly Insights for Modern Applications

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

AI-Driven Anomaly Insights for Modern Applications

Service Description

Turnkey deployment of anomaly detection AI services, enabling application owners and organisations to proactively identify risks and inefficiencies across business-critical software systems.

Features

- Custom integration with existing application landscapes and data sources
- Real-time anomaly detection leveraging advanced AI and ML algorithms
- Automated alerts and incident reporting for rapid response
- Root cause analysis tools to accelerate issue resolution
- Scalable deployment supporting both cloud and hybrid environments
- Continuous model tuning for evolving application data patterns
- Interactive dashboards with actionable insights and visualizations
- Compliance-ready frameworks tailored to regulated industries
- Seamless handover and enablement for internal IT and business users
- Ongoing support, performance optimization, and enhancement services

Benefits

- Reduce unplanned downtime by swiftly surfacing critical application issues
- Enable data-driven decision-making with actionable anomaly insights
- Mitigate operational risk through early detection of threats and outliers
- Improve software reliability, customer experience, and stakeholder trust
- Accelerate incident response and minimize business impact
- Lower total cost of ownership through automation and proactive monitoring
- Empower teams to focus on innovation, not manual troubleshooting
- Easily scale analytics as business and application complexity grows
- Ensure regulatory compliance with transparent auditability features
- Future-proof investments with continuous AI model improvement

Constraints

Requires access to relevant application data streams and stakeholder alignment for integration.
