

Real-Time Application Integration & Event-Driven Function Enablement

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Real-Time Application Integration & Event-Driven Function Enablement

Service Description

A consulting service for organisations needing seamless application integration, real-time data processing, and scalable event-driven automation.

Features

- Event stream processing enables instant data-driven actions across platforms.
- Design and implementation of serverless functions for flexible automation.
- Integration of disparate enterprise applications for seamless workflows.
- High-availability orchestration to ensure zero downtime operations.
- Real-time analytics and monitoring of event processing streams.
- Custom connector development for non-standard application endpoints.
- Scalable architecture supporting fluctuating workloads and business growth.
- Security controls for data integrity and access management throughout pipelines.
- Automated error handling and recovery to maintain business continuity.
- Comprehensive documentation and knowledge transfer for internal IT teams.

Benefits

- Drives faster business insights through real-time data processing.
- Enables agile responses to market or operational triggers automatically.
- Reduces manual integration efforts, lowering operational costs.
- Improves reliability and uptime of essential business operations.
- Facilitates seamless digital transformation initiatives.
- Easily adapts to future integration requirements and new platforms.
- Empowers IT teams with automated, manageable workflows.
- Mitigates risks via robust security and governance practices.
- Enhances customer experiences with rapid, consistent service delivery.
- Gives competitive advantage through adaptive, event-driven architectures.

Constraints

Requires modern application environments and access to integration endpoints.
Customisation may extend timelines.
