

Quality Assurance and Performance Testing

G Cloud 15 - LOT3

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

Service Description

Insight delivers comprehensive QA and performance testing to ensure flawless functionality, security, and scalability. Using manual and automated strategies, we validate software quality across all environments, detect bottlenecks, and optimise speed under load. Our agile approach guarantees reliable, high-performing applications that meet user expectations and industry standards

Constraints

None specified

Pricing Options

Pricing Option 1

Pricing Unit:

Time & Materials (T&M;)

Unit Qty Definition:

Per Resource-Day

Rationale:

QA and performance testing often evolve with changing requirements, environments, and defect findings, making T&M; suitable for iterative test design, execution, and re-testing while maintaining flexibility and transparency. It aligns well with embedded QA in Agile delivery pods where scope and effort are not fully predictable upfront.

Complexity Level	Unit Price	Unit Measure
Low Complexity	£2,600	per resource-day
Medium Complexity	£3,650	per resource-day
High Complexity	£5,000	per resource-day

Pricing Assumptions:

- 22 working days per month is the standard capacity baseline for pricing across all services and complexity tiers.
- All prices are exclusive of VAT.
- This figure already includes normal public holidays, weekends, and excludes overtime unless explicitly stated.
- Seniority & Skill Mix: Low = mid level consultants/engineers; Medium = senior consultants/architects; High = principal architects/SMEs.
- Scope & Effort: Higher complexity = more heterogeneity, integrations, governance, risk, and stakeholder management.
- Volume & Scale: Sometimes tied to asset/user/API counts but often reflects qualitative complexity.

Pricing Option 2

Pricing Unit:

Dedicated Team

Unit Qty Definition:

Per Team-Month

Rationale:

Continuous QA support and embedded QA engineers within Agile teams are best priced as a Dedicated Team, providing predictable monthly costs and sustained expertise for ongoing regression, performance, and security testing across releases.

Complexity Level	Unit Price	Unit Measure
Low Complexity	£52,900	per QA/performance testing team per month
Medium Complexity	£75,900	per QA/performance testing team per month
High Complexity	£104,000	per QA/performance testing team per month

Pricing Assumptions:

- 22 working days per month is the standard capacity baseline for pricing across all services and complexity tiers.
- All prices are exclusive of VAT.
- This figure already includes normal public holidays, weekends, and excludes overtime unless explicitly stated.
- Seniority & Skill Mix: Low = mid level consultants/engineers; Medium = senior consultants/architects; High = principal architects/SMEs.
- Scope & Effort: Higher complexity = more heterogeneity, integrations, governance, risk, and stakeholder management.
- Volume & Scale: Sometimes tied to asset/user/API counts but often reflects qualitative complexity.
- 22 working days per month is the standard capacity baseline for costing a dedicated team.

- Engagements are long term and stable — typically 6 to 12+ month minimum term.
- Teams are fully utilised on the customer programme.
- Service is delivered continuously across the year (not project spikes), often with 24/7 coverage if SLA requires.

Pricing Option 3

Pricing Unit:

Fixed Price

Unit Qty Definition:

Per Assessment

Rationale:

For well-defined testing engagements such as a specific performance test cycle, a regression pack for a known release, or a discrete security/compatibility test phase, Fixed Price works well by giving budget certainty and clear deliverables.

Complexity Level	Unit Price	Unit Measure
Low Complexity	£32,000	per assessment
Medium Complexity	£46,000	per assessment
High Complexity	£64,000	per assessment

Pricing Assumptions:

- 22 working days per month is the standard capacity baseline for pricing across all services and complexity tiers.
- All prices are exclusive of VAT.
- This figure already includes normal public holidays, weekends, and excludes overtime unless explicitly stated.
- Seniority & Skill Mix: Low = mid level consultants/engineers; Medium = senior consultants/architects; High = principal architects/SMEs.
- Scope & Effort: Higher complexity = more heterogeneity, integrations, governance, risk, and stakeholder management.
- Volume & Scale: Sometimes tied to asset/user/API counts but often reflects qualitative complexity.
- Well bounded scope, typically 3 to 6 weeks elapsed for assessments or up to several months for setups/migrations.
- Defined scope and deliverables per complexity tier.

- Any changes to scope of project will be impacted accordingly.
