

RapidLaunch Low-Code Database Enablement

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

RapidLaunch Low-Code Database Enablement

Service Description

Accelerate business agility with streamlined implementation of low-code database platforms, ideal for organisations seeking fast, scalable solutions with minimal coding overhead.

Features

- Comprehensive assessment of existing data architecture and workflows
- Tailored low-code platform selection and fit-gap analysis
- Rapid prototyping of custom database applications
- Seamless integration with existing enterprise systems and APIs
- Automated migration of legacy databases to new low-code environments
- Role-based access and governance configurations for security compliance
- User enablement workshops and on-demand platform training
- Performance optimization and scalability planning
- Best-practice documentation and operational runbooks
- Ongoing support and platform lifecycle management

Benefits

- Dramatically reduces development timelines for database solutions
- Empowers business users with intuitive, self-service interfaces
- Minimizes reliance on specialist coding and IT resources
- Enables rapid adaptation to evolving business requirements
- Reduces technical debt from legacy database technologies
- Enhances cross-team collaboration and data transparency
- Strengthens data governance and access control measures
- Improves integration with cloud and hybrid environments
- Lowers total cost of ownership for database management
- Accelerates time-to-value for digital transformation initiatives

Constraints

Requires buy-in from IT and business stakeholders. Platform choices may be limited by existing infrastructure.
