

Proactive AI Anomaly Detection Enablement

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Proactive AI Anomaly Detection Enablement

Service Description

Consulting-led deployment of advanced AI anomaly detection software, empowering organisations to spot and resolve digital irregularities swiftly.

Features

- Comprehensive assessment of existing application data pipelines
- Selection and integration of leading AI anomaly detection platforms
- Customisation of detection algorithms to match business operations
- Automated monitoring across real-time and historical data streams
- Root cause analysis and dynamic alert configuration
- Seamless integration with ITSM and DevOps workflows
- Dashboards and visualisations for actionable anomaly insights
- Collaboration with stakeholders to define incident thresholds
- Continuous model tuning for evolving data patterns
- Expert training and knowledge transfer to internal teams

Benefits

- Accelerated detection of critical system and business anomalies
- Reduction in downtime through rapid incident response
- Enhanced operational resilience and digital asset protection
- Minimised revenue loss from undetected issues
- Improved compliance by surfacing unusual patterns
- Reduced manual monitoring workload for IT teams
- Data-driven decision support for operational leaders
- Faster root cause identification shortens resolution times
- Future-proofing via adaptive, self-learning AI models
- Empowerment of staff with tailored analytics and best practices

Constraints

Requires access to relevant data sources and stakeholder cooperation for integration.
