

Intelligent Endpoint Output & Device Management Suite

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Intelligent Endpoint Output & Device Management Suite

Service Description

A comprehensive consulting and managed service for enterprises to optimize, govern, and secure all endpoint output devices, ensuring efficiency and compliance.

Features

- Centralized device discovery and inventory across all endpoint types
- Automated device provisioning and configuration management
- Unified dashboard for real-time output monitoring and control
- Role-based access and policy enforcement for device usage
- Advanced analytics and reporting on device performance and output
- Integrated print output routing and cost optimization tools
- Proactive security monitoring and automated threat remediation
- Lifecycle management including updates, patching, and refresh cycles
- Compliance tracking to meet regulatory and data privacy requirements
- Expert-led device troubleshooting and remote support services

Benefits

- Boosts endpoint output reliability and business productivity
- Reduces operational costs through automated management
- Minimizes device-related security incidents and data leaks
- Improves compliance with industry and corporate standards
- Provides actionable insights for smarter asset decisions
- Frees IT teams by automating manual device tasks
- Ensures consistent end-user experience across locations
- Supports agile workplace transformation and hybrid models
- Accelerates onboarding of new devices and user profiles
- Empowers sustainable, energy-efficient output ecosystems

Constraints

Requires client network connectivity and access to all managed endpoints. Supported devices must run compatible firmware or OS.
