

Accelerated Application Engineering Enablement

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Accelerated Application Engineering Enablement

Service Description

A premium, consultancy-led service empowering organisations to modernise application development with advanced languages, tools, and frameworks that optimise delivery and innovation.

Features

- Assessment of current development environments and coding practices
- Selection of optimal development languages and technology stacks
- Hands-on enablement with modern IDEs and toolchains
- Integration guidance for CI/CD pipelines and automation
- Best practice consulting for agile and DevOps adoption
- Blueprinting scalable, maintainable application architectures
- Security and compliance integration into development workflows
- Customised training sessions for teams on new frameworks
- Performance benchmarking of code and development lifecycle
- Ongoing technical mentorship and support post-enablement

Benefits

- Faster time-to-market for business-critical applications
- Reduced technical debt with future-focused architectures
- Enhanced developer productivity and team collaboration
- Improved software quality and fewer production issues
- Seamless integration with cloud and on-premises platforms
- Better security posture starting from code inception
- Scalable processes that grow with organisational needs
- Increased innovation through adoption of modern practices
- Measurable reductions in deployment and release friction
- Long-term upskilling of in-house development capabilities

Constraints

Requires client commitment to training and process change; existing legacy systems may limit full adoption.
