

Smart Manufacturing Software Enablement

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Smart Manufacturing Software Enablement

Service Description

A consulting service for enterprises seeking to implement or optimise computer-aided manufacturing applications, enhancing production efficiency and digital transformation.

Features

- Comprehensive assessment of current manufacturing IT landscape
- Bespoke implementation roadmap for CAM software integration
- Vendor-agnostic selection of leading CAM platforms
- Seamless integration with existing ERP and production systems
- End-to-end project management and risk mitigation
- Advanced automation of production workflows
- Custom solution development for unique manufacturing needs
- User training and change management for sustained adoption
- Secure, scalable system architecture design
- Ongoing performance monitoring and optimisation

Benefits

- Accelerate digital transformation of manufacturing operations
- Increase production efficiency and throughput
- Reduce operational costs through process automation
- Enhance product quality with precision-driven software controls
- Shorten implementation timelines with expert project delivery
- Mitigate integration risks and avoid costly disruptions
- Empower teams with targeted training and support
- Support compliance through auditable, secure systems
- Enable rapid adaptation to market and technology changes
- Leverage data insights for continuous process improvement

Constraints

Client must provide access to current production systems and key stakeholders.
