

Cloud Infrastructure Performance Validation & Optimization Service

G Cloud 15 - LOT3

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Cloud Infrastructure Performance Validation & Optimization Service

Service Description

Comprehensive performance testing for enterprise cloud environments, ensuring robust infrastructure, reliability, and scalability for organizations migrating or operating in the cloud.

Features

- End-to-end analysis of cloud infrastructure performance under varying loads
- Comprehensive load, stress, volume, soak, and scalability testing protocols
- Custom test script design tailored to business-critical applications
- Automated benchmarking against industry best practices and SLAs
- Root cause identification and remediation guidance for detected bottlenecks
- Detailed reporting of throughput, latency, and system responsiveness metrics
- Simulation of real-world traffic patterns and peak utilization scenarios
- Proactive resource utilization and cost efficiency assessment
- Continuous integration with DevOps workflows for ongoing optimization
- Executive-ready recommendations for infrastructure tuning and scaling

Benefits

- Reduces risk of outages by revealing infrastructure weaknesses early
- Enhances user experience through optimized system responsiveness
- Supports confident go-live decisions for cloud migrations and upgrades
- Improves ROI by ensuring efficient resource allocation and cloud spend
- Fosters compliance with organizational and regulatory performance standards
- Enables scalability to accommodate business growth with minimal disruption
- Streamlines capacity planning with actionable, data-driven insights
- Minimizes downtime and impact during critical business periods
- Empowers IT teams with expert guidance and proven methodologies
- Builds stakeholder trust through transparent, evidence-backed performance metrics

Constraints

Requires environment access, defined test criteria, and stakeholder coordination; excludes code refactoring.
