

Enterprise-Grade Application Server Platform Deployment

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Enterprise-Grade Application Server Platform Deployment

Service Description

Seamless design and deployment of robust application server platforms for enterprises seeking reliable, scalable, and future-ready business applications.

Features

- Comprehensive assessment of current application workloads and hosting environments
- Bespoke architecture design tailored for optimal scalability and performance
- Deployment of leading enterprise application server software, on-premises or cloud
- Integration with existing platforms, databases, and middleware systems
- Automated build and deployment pipelines for rapid, repeatable releases
- Rigorous security hardening aligned to industry compliance standards
- Full end-to-end migration support for legacy or monolithic applications
- Continuous monitoring, health checks, and proactive issue remediation
- Developer enablement through best-practice documentation and knowledge transfer
- Ongoing optimisation and lifecycle support for evolving business needs

Benefits

- Accelerate time-to-market for critical business applications
- Lower total cost of ownership via efficient automated deployment
- Enhance application resilience and fault tolerance
- Simplify integration with enterprise systems and data sources
- Enable DevOps practices for agile business responsiveness
- Increase security with robust governance and compliance controls
- Future-proof infrastructure supporting microservices and cloud-native workloads
- Reduce manual errors through automation and standardisation
- Empower teams with expert guidance and proven methodologies
- Maximise business agility with scalable, adaptable platforms

Constraints

Requires existing infrastructure assessment and defined application requirements. Licensing for server software not included.
