

Solution Brief

Insight Storage Foundation Deployment Service

Background and business challenge

New server workloads are demanding and require improved processor performance, massive memory, and faster storage. New technologies are also accelerating the creation of data. For example, Artificial Intelligence (AI) growth has far-reaching implications for storage and other IT systems.

As data volumes continue to increase, so does the need for modern storage solutions. Given the many viable options in today's market (cloud, flash, hyperconverged, to name a few), the selection process can be complicated. Virtualisation and storage skills are high in demand, and implementation complex and lengthy.

We can help.

Our solution

The Insight Storage Foundation Deployment service is a pre-scoped deployment module for designing and installing a single Storage Array Solution.

Clients may have limited resources or skills to design and deploy Storage Solutions, and the Storage Deployment service provides this capability to Insight clients. As a Certified Storage Partner in multiple vendor solutions, Insight can provide comprehensive storage solution deployment utilising our certified consultants and engineers. The Storage Deployment service is suitable for Dell/EMC, Netapp, Pure Storage and HPE storage array deployments into client locations.

We provide a pre-scoped, fixed-cost service inclusive of all resources to simplify the complexity and approach for Insight clients.

Our partners

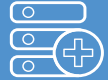

Related services

- Hybrid Cloud Services
- Nutanix Cluster Deployment Service

What you can expect

- Certified Storage Specialists giving you the confidence that your project is in qualified hands
- National UK Coverage including SC cleared engineers
- A complete package including design, deployment and project management to a predefined scope
- Insight follows Vendor Best Practice Standards and approach ensuring optimal implementation
- Knowledge transfer and detailed documentation as-built report
- Quick, simple, no risk, fixed cost deployment

Business outcomes

	Agile scaling balances performance and capacity for your specific workloads – more efficient use of available resources optimising costs
	Automated management features simplify storage operations – IT staff have time to focus on other projects
	Improved cloud integration optimises availability, functionality and TCO leading to user productivity benefits

Why Insight

We help our clients modernise and secure critical platforms to transform IT. We believe data is a crucial driver, hybrid models are accelerators, and secure networks are well integrated. Our end-to-end services empower companies to effectively leverage technology solutions to overcome challenges, support growth and innovation, reduce risk, and transform the business.

A storage leader for more than 25 years	Deep expertise of the entire data centre	Manage 3,300+ arrays via Insight OneCall	Strong relationships with market-leading storage vendors	>10PB of storage/backup supported through Managed Services
