1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Service Offering

Service Description

Insight's Azure Well-Architected Review Service is designed to support organisations with reviewing their Azure environment to ensure it follows best practices.

The service is a focussed assessment aligned to the Azure Cloud Adoption & Well-Architected Frameworks – it provides an actionable and costed remediation plan for optimising an organisation's Azure environment.

Service Overview

Helping customers optimise their Azure environments - given the widespread use of cloud technologies, enterprises deploying workloads on Azure are faced with the question "Are You Well-Architected?"

A well-architected system is one that should be capable of helping the business achieve set objectives, evolve with new technology and adapt to changes. Whether you are thinking about migrating to the cloud or already running workloads in the cloud, Insight offers an Azure Well Architected Review Service to help you optimise your Azure environment.

The service is designed to complete a technical discovery and assessment of your existing Azure Environment, and provide best practice recommendations for optimising the deployed Azure Services. The service has been developed in line with the Microsoft's Well-Architected Framework (WAF).

Service Summary

Insight's Azure Well-Architected Review Service covers assessing your business & technical requirements and producing a best practices strategy for your Azure environment. The service will be delivered as a two-way consultative engagement and engineered to deliver the following business outcomes, and strategic objectives:

- Technical review of business requirements and strategy for your Azure Environment.
- Complete a discovery and optimisation assessment of your Azure subscriptions and resources deployed.
- Review the current identity & access management, security, networking & connectivity, backup & disaster recovery, and monitoring & management setup.
- Provide best practice technical recommendations for optimising the Azure environment and services.
- Review of the technical output report with next steps planning with your project stakeholders.

The service will support with addressing the challenges and optimisation exercises required to ensure that the services deployed in Azure are continually improved, remain cost-effective and secure, and be managed according to best practices.

Insight will produce an Azure Well-Architected Review Report from discovery & assessment's findings, which will include best practice recommendations for optimising the Azure Environment and an estimate of the engineering effort for completing the recommended remediation activities. Insight will review the output report with the project stakeholders and discuss the recommended next steps.
