

Accelerated Application Component Engineering

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Accelerated Application Component Engineering

Service Description

Comprehensive service for enterprises to design, build, and integrate reusable software construction components, streamlining complex application development.

Features

- Expert assessment of existing application architecture and development needs
- Design and build tailored software components for rapid integration
- Development of reusable libraries and frameworks
- Best-practice aligned coding standards and documentation
- Automated unit and integration testing frameworks
- Component-based security and compliance integration
- Performance tuning and optimization of software modules
- Support for multi-platform and cloud-native deployment models
- Knowledge transfer and developer enablement workshops
- Ongoing lifecycle support and component maintenance services

Benefits

- Accelerates new application development and time-to-market
- Reduces engineering costs through modular, reusable components
- Improves code quality and maintainability across projects
- Enables seamless integration with existing and future solutions
- Enhances software performance and scalability
- Minimizes security vulnerabilities through standardized practices
- Facilitates adoption of modern development frameworks
- Strengthens in-house developer capabilities and autonomy
- Supports compliance with industry and organizational standards
- Ensures robust, long-term support for critical application components

Constraints

Requires client engagement from solution architects and development leads; integration scope may be limited by legacy systems.
