1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Service Description and Pricing

What the Service Is

The Insight Agentic Development Platform is an advanced, AI-driven ecosystem designed to accelerate and de-risk the delivery of bespoke applications, data, and AI solutions for public sector organisations. The platform combines a curated library of AI-ready components, intelligent automation, and robust governance to enable rapid, secure, and scalable digital transformation.

Platform Features

- **AI-Ready Component Library:** Access to a growing library of proven modules, integrations, and accelerators for rapid solution assembly.
- **Intelligent Automation:** Context-aware automation streamlines delivery, reduces manual effort, and minimises risk.
- **End-to-End Delivery:** From discovery to deployment, Insight delivers custom applications, data platforms, and AI services tailored to public sector priorities.
- **Secure & Compliant by Design:** Security, accessibility, and data protection are embedded throughout the platform.

Pricing

Insight AI prices the Agentic Software Development Platform in addition to its extended delivery team model (engaged on a T&M basis off the agreed Framework Rate Card) with a standard platform fee of £3,000 (exc VAT) per month per Extended Delivery Team user.

This fee provides access to the platform and its suite of productivity and automation tools for the extended team member.

The team member will have access to agentic resources that will support accelerated and high-quality software delivery. Pilot projects put the increase in efficiency at 2-3x more productive- our teams are able to do more, with less.

Based on this increase in productivity, the cost savings are between 30-55% of an equivalent delivery team without use of the platform.

Each service is uniquely tailored to the individual organisation, ensuring that the platform configuration, integrations, and support align with specific business needs and objectives.

It's important to note that the platform fee does not include costs for LLM (Large Language Model) tokens, which are billed separately based on actual usage.

This transparent approach allows organisations to benefit from advanced AI-driven capabilities while maintaining clarity around both platform and AI consumption costs.
