

Accelerated Model-Driven Application Platform Enablement

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Accelerated Model-Driven Application Platform Enablement

Service Description

Comprehensive consulting and implementation for enterprises adopting model-driven application platforms to rapidly modernize business applications and workflows.

Features

- Strategic assessment of current application development landscape and readiness
- Tailored platform selection and architecture blueprinting
- Model-driven design workshops with key business and IT stakeholders
- Rapid prototyping of critical business applications using modular building blocks
- End-to-end platform deployment and configuration, including DevOps integration
- Seamless migration of legacy apps to model-driven frameworks
- Enablement of reusable components, templates, and automation assets
- Best practice governance and lifecycle management guidance
- Comprehensive user training for business and technical teams
- Post-launch support, optimization reviews, and scalable roadmap planning

Benefits

- Accelerates digital transformation with low-code, high-productivity solutions
- Drives business agility by enabling rapid app creation and iteration
- Reduces reliance on scarce developer resources via model-driven approaches
- Minimizes technical debt through standardized, governed frameworks
- Improves alignment between business needs and IT delivery
- Optimizes total cost of ownership and ROI on application investments
- Enhances security and compliance with controlled platform environments
- Supports seamless integration with existing processes and data sources
- Ensures user adoption with hands-on training and change management
- Positions organizations for scalable future app development initiatives

Constraints

Requires cloud-enabled infrastructure and stakeholder commitment for business process reviews.
