1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Service Offering

Service Description

Insight's AWS Modernisation with Infrastructure as Code (IaC) is designed to support organisations planning, managing and provisioning AWS resources using Terraform and AWS CloudFormation.

The service will help to improve the speed, reliability, and consistency of AWS deployments with automation, while reducing human errors and operational costs.

Service Overview

Insights AWS IaC service can help you overcome these challenges faced by Inconsistency, Slow delivery, lack of visibility and also secure risks by enabling you to:

- Define your cloud infrastructure using code, which can be versioned, tested, and validated before deployment.
- Automate the provisioning and configuration of your cloud resources, reducing the time and effort required to launch and update them. Is this solution right for you?
- Manage your cloud infrastructure as code, which can be stored, tracked, and reviewed in a source control system, providing a single source of truth and a record of changes.
- Enforce cloud policies and best practices as code, ensuring that your cloud resources comply with the desired standards and regulations.

Service Summary

Insights AWS IaC service is a consultant-led engagement that helps you manage and provision your cloud resources using code. You can use either Terraform or CloudFormation, two popular tools for IaC, to create reusable and modular code modules that define your cloud infrastructure. With IaC, you can deploy your cloud resources faster, more reliably, and more consistently across different environments.

The service includes:

- Working with your development and operational teams to understand the automation that can be achieved.
- Building code modules in either Terraform or CloudFormation.
- Educating development and operational teams in IaC best practices and deployment processes.
- Deploying non-production environment using the IaC modules.
- Providing documentation within the code base to inform future modifications and enhancements.
