

Intelligent Application Architecture & Object Modeling Advisory

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Intelligent Application Architecture & Object Modeling Advisory

Service Description

Robust application architectures using modern object modeling tools, helping enterprises accelerate efficient and scalable software development.

Features

- Comprehensive assessment of existing application architecture landscape
- Tailored object modeling tool selection and integration support
- Development of future-proof application architecture blueprints
- Best-practice object model design aligned to business goals
- Stakeholder workshops to define and validate model requirements
- Collaboration with DevOps for seamless model-driven deployment
- Governance frameworks for ongoing model and architecture management
- Accelerated prototyping to validate object models early
- Documentation and knowledge transfer for in-house teams
- Change management guidance to smooth adoption across teams

Benefits

- Reduces complexity and risk in application development initiatives
- Improves scalability and flexibility of enterprise software systems
- Accelerates time-to-market for new digital products
- Enhances collaboration across architecture, development, and business teams
- Increases reuse and longevity of core software components
- Supports regulatory and security compliance via structured models
- Enables seamless integration with modern CI/CD pipelines
- Boosts developer productivity and code quality
- Facilitates clearer communication through visual modeling artifacts
- Empowers organizations to manage architectural change proactively

Constraints

Requires client access to key stakeholders and development environments; scope excludes legacy system remediation.
