

Graph Data Platform Enablement for Modern Applications

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Graph Data Platform Enablement for Modern Applications

Service Description

Accelerate innovation by integrating graph database technology into your enterprise applications. Ideal for organizations seeking enhanced data relationships, agility, and advanced analytics.

Features

- Tailored assessment of current data architecture and readiness
- Graph database technology selection and integration strategy
- Custom schema and relationship modeling design workshops
- Secure, scalable deployment of graph databases
- Data migration and transformation planning and execution
- Integration of graph databases with existing applications
- Performance tuning and indexing for optimal graph queries
- Role-based access controls and security best practices
- Ongoing platform monitoring and proactive maintenance
- Comprehensive enablement and knowledge transfer for teams

Benefits

- Unlock complex data relationships for actionable business insights
- Accelerate application development with flexible data models
- Reduce query times for connected data scenarios dramatically
- Empower advanced use cases like fraud detection and recommendation
- Enhance data governance and security across applications
- Improve agility in responding to changing business requirements
- Minimize downtime and operational risk during platform adoption
- Foster collaboration between business and IT teams
- Enable future-proof scalability as data volumes grow
- Strengthen competitive differentiation through intelligent data use

Constraints

Requires commitment to modernizing data workflows and integration with supported applications.
