

Datacentre Automation & Control Excellence

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Datacentre Automation & Control Excellence

Service Description

Comprehensive automation solutions for modern datacentres, designed for enterprises seeking seamless system management, operational efficiency, and robust application governance.

Features

- End-to-end automation of datacentre system workflows and processes
- Centralised configuration management for applications and infrastructure
- Proactive system health monitoring and automated remediation
- Customisable policy enforcement to meet compliance requirements
- Integration with leading IT service management platforms
- Automated patch management for operating systems and applications
- Role-based access controls for governance and security
- Real-time reporting and analytics on system performance and changes
- Rapid incident detection with workflow-driven response automation
- Scalable architecture supporting hybrid and multi-cloud datacentre models

Benefits

- Reduces manual errors and operational risks across the datacentre
- Accelerates deployment timelines for new applications and services
- Improves compliance with automated policy implementation
- Boosts system uptime through proactive issue resolution
- Enables consistent configuration management at scale
- Enhances IT productivity through reduced repetitive tasks
- Empowers governance with detailed audit trails and reporting
- Simplifies integration into existing enterprise IT landscapes
- Strengthens security posture with unified access controls
- Supports business agility and cost control in fast-changing environments

Constraints

Requires integration with supported infrastructure. Custom policies may need client input.
