

Device Management

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Device Management

Service Description

Unmanaged devices increase security risks, compliance issues, and operational inefficiencies. Microsoft 365 Device Management centralizes control, enforces security policies, and streamlines updates—resolving fragmentation, reducing vulnerabilities, and ensuring consistent protection across corporate and BYOD environments, while enabling secure access and productivity without compromising user experience.

Features

- Centralized device enrollment for corporate and BYOD environments.
- Remote wipe capabilities to protect data on lost devices.
- Automated device compliance checks against organizational security policies.
- Conditional access enforcement based on device health and status.
- Real-time inventory tracking for all managed devices.
- Configuration profiles for consistent device settings and security baselines.
- Application deployment and updates across multiple device platforms.
- Integration with Intune for unified endpoint management and control.
- Role-based administration for secure device management operations.
- Detailed reporting for compliance, usage, and device lifecycle management.

Benefits

- Improves security by enforcing compliance across all managed devices.
- Reduces risk of data breaches on lost or stolen devices.
- Simplifies administration with centralized device management and reporting.
- Enhances productivity through streamlined app deployment and updates.
- Supports BYOD securely with conditional access and compliance checks.
- Minimizes downtime via remote troubleshooting and configuration management.
- Ensures consistent security baselines across diverse device platforms.
- Provides visibility into device inventory for better resource planning.

- Automates policy enforcement to maintain organizational standards effortlessly.
- Strengthens governance with detailed compliance and lifecycle reporting.
