

Intelligent Cloud System Enablement

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Intelligent Cloud System Enablement

Service Description

A premium consulting service to design, implement, and optimise cloud system software for enterprises seeking robust, scalable, and secure infrastructure transformation.

Features

- Comprehensive assessment of existing compute infrastructure and readiness
- Bespoke architecture design for cloud-based system software deployment
- Integration of physical and virtual computing environments seamlessly
- Deployment of software-defined compute to optimise resource allocation
- Automated provisioning and orchestration of compute resources
- Advanced security configuration aligned with best practices and compliance
- Performance benchmarking and ongoing tuning of system workloads
- Unified monitoring platform for visibility across hybrid and cloud estates
- Disaster recovery and high-availability strategies built into solution
- Expert change management and staff enablement for adoption success

Benefits

- Accelerate digital transformation with expert-led infrastructure enablement
- Reduce operational complexity through managed automation and orchestration
- Enhance system scalability to support business growth seamlessly
- Strengthen security and compliance posture across hybrid environments
- Optimise compute costs with dynamic resource allocation and monitoring
- Ensure business continuity via resilient architecture and disaster recovery
- Gain real-time visibility and control across all infrastructure layers
- Empower staff with tailored training and change management support
- Minimise project risks through structured methodology and best practices
- Unlock future innovation potential with flexible, modular systems

Constraints

Requires compatible infrastructure and cloud accounts; some legacy systems may need remediation.
