

Cloud-Native Compute Acceleration & Automation Advisory

G Cloud 15 - LOT1A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Cloud-Native Compute Acceleration & Automation Advisory

Service Description

Expert consultancy for enterprises adopting container and serverless compute, focusing on scalable, resilient, and efficient IaaS modernisation.

Features

- Comprehensive cloud-native readiness assessment and architecture blueprint
- Design of multi-cloud container and serverless compute environments
- Security and compliance frameworks tailored for cloud-native workloads
- Best practice deployment guides for Kubernetes and serverless engines
- Performance tuning and workload right-sizing strategies
- Automated CI/CD pipeline integration for application agility
- Disaster recovery and high availability planning for containerised apps
- Cost optimisation and resource utilisation analysis
- Training and enablement for DevOps and platform teams
- Governance models for effective container lifecycle management

Benefits

- Accelerate time-to-market for business-critical applications
- Boost infrastructure scalability and operational flexibility
- Reduce infrastructure complexity with expert automation frameworks
- Enhance workload resilience and minimise service downtime
- Lower total cost of ownership through efficient resource usage
- Mitigate security risks with robust cloud-native practices
- Empower teams with up-to-date DevOps methodologies
- Ensure compliance through integrated governance structures
- Improve cross-team collaboration and deployment velocity
- Future-proof your environment for evolving business and tech needs

Constraints

Requires access to existing cloud environments and stakeholder alignment for implementation.
