

SDN Transformation & Optimisation Consulting

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

SDN Transformation & Optimisation Consulting

Service Description

Comprehensive advisory and implementation services to help enterprises modernise, deploy, and optimise software-defined networking (SDN) for agile, secure, and scalable digital infrastructure.

Features

- End-to-end SDN readiness assessment and network baseline analysis
- Custom architecture design tailored to current and future needs
- Strategic roadmap for phased SDN adoption and integration
- Vendor-neutral technology and solution selection guidance
- Comprehensive migration and transformation planning
- Hands-on deployment of SDN controllers and network overlays
- Policy-driven automation and segmentation configuration
- Proactive performance testing and optimisation for reliability
- Security posture evaluation and embedded controls design
- Expert knowledge transfer and ongoing support enablement

Benefits

- Accelerates network agility and digital transformation initiatives
- Reduces operational costs through intelligent traffic automation
- Improves scalability to meet dynamic business demands
- Enhances security with programmable, policy-based controls
- Enables seamless integration of cloud and on-premise networks
- Decreases downtime through proactive monitoring and optimisation
- Empowers IT staff via upskilling and knowledge transfer
- Streamlines compliance with centralised policy management
- Strengthens business continuity and disaster recovery capabilities
- Delivers competitive advantage through network innovation

Constraints

Client must supply current network documentation and permit access for assessments.
