

Intelligent Automated Quality Assurance Consulting

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Intelligent Automated Quality Assurance Consulting

Service Description

A consulting service delivering end-to-end automation of software quality processes, tailored for enterprises seeking robust, reliable, and efficient development cycles.

Features

- Comprehensive assessment of current software QA landscape and maturity
- Design of customized automated testing frameworks and pipelines
- Selection and integration of leading-edge automation tools and platforms
- Creation of reusable automated test case libraries
- Continuous integration and test automation strategy development
- Test data management and synthetic data generation solutions
- Automated performance and security testing configuration
- Training workshops for in-house teams on automation best practices
- Governance and reporting automation for full visibility and compliance
- Ongoing support for optimization and scaling of QA automation

Benefits

- Accelerates software release cycles with fewer manual bottlenecks
- Improves overall application reliability and defect detection rates
- Reduces operational costs associated with manual QA processes
- Enables consistent regression testing at scale
- Enhances visibility into test coverage and quality metrics
- Minimizes risk of critical defects reaching production
- Empowers in-house teams with modern automation capabilities
- Scales QA efficiently across multiple projects and teams
- Facilitates compliance and audit readiness through documentation
- Drives continuous improvement in software development life cycles

Constraints

Requires access to source code, dev environments, and stakeholder time for onboarding.
