

Cloud-Native Database Platform Enablement

G Cloud 15 - LOT1A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Cloud-Native Database Platform Enablement

Service Description

Strategic advisory and hands-on enablement for organizations adopting modern PaaS database management to optimize scalability, availability, and operational efficiency.

Features

- Comprehensive cloud database platform assessment and readiness analysis
- Tailored database migration planning and modernization roadmap
- Selection guidance for optimal database service models and engines
- Design and deployment of high-availability architectures
- Automated scaling and performance optimization configuration
- Integrated security best practices and compliance alignment
- Data backup, disaster recovery, and continuity strategy implementation
- Proactive monitoring and incident response integration
- Cost management and optimization recommendations
- Ongoing enablement workshops for client technology teams

Benefits

- Accelerates digital transformation with expert-led cloud adoption guidance
- Improves service uptime through resilient design and built-in high availability
- Reduces operational burden with automated maintenance and scaling
- Optimizes platform performance for evolving business workloads
- Protects sensitive data via integrated, modern security practices
- Minimizes migration risk with structured, phased planning
- Empowers teams to manage future database needs confidently
- Ensures regulatory alignment and improved audit readiness
- Delivers predictable costs and improved ROI for database operations
- Supports business agility and innovation through scalable architecture

Constraints

Requires existing cloud tenancy and access; scope excludes legacy unsupported databases.
