

Accelerated Application Platform Deployment Services

G Cloud 15 - LOT1A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Accelerated Application Platform Deployment Services

Service Description

Rapid enablement and optimisation of cloud-native application platforms for enterprises seeking scalable, resilient deployments.

Features

- Comprehensive assessment of current application deployment readiness
- Customised platform selection matched to enterprise requirements
- End-to-end automation of deployment pipelines
- Seamless integration with leading cloud PaaS solutions
- Security-hardened deployment practices and controls
- DevOps workflow enablement and knowledge transfer
- Continuous integration and delivery (CI/CD) best practices implemented
- Cost-optimised configuration ensuring scalability and agility
- Ongoing performance monitoring and tuning
- Detailed documentation and operational handover

Benefits

- Accelerates time-to-value for new digital services
- Reduces deployment risk through expert-led automation
- Ensures alignment with industry best practices and compliance
- Enhances platform scalability to meet business growth
- Optimises cloud spend with right-sized environments
- Minimises operational downtime and deployment errors
- Increases team productivity with automated workflows
- Improves security posture from initial deployment
- Facilitates application resilience and reliability
- Empowers IT teams with operational knowledge and support

Constraints

Requires compatible PaaS provider and access to application code repositories.
