

Intelligent Data Archiving & Lifecycle Strategy

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Intelligent Data Archiving & Lifecycle Strategy

Service Description

This service delivers modern data archiving, integration, and lifecycle management for organisations seeking to balance compliance, cost, and actionable intelligence.

Features

- Comprehensive data estate assessment with industry benchmarks
- Design of end-to-end data archiving and retention policies
- Integration of multi-source data into unified archives
- Automated lifecycle rule creation for structured and unstructured data
- Regulatory compliance mapping and documentation
- Cloud and hybrid archiving architecture recommendations
- Data discoverability and rapid retrieval strategy
- Implementation roadmap for minimal business disruption
- Training for IT and business teams on lifecycle protocols
- Ongoing monitoring and periodic optimization recommendations

Benefits

- Reduce storage costs by optimizing data retention and tiering
- Lower compliance risk with robust regulatory alignment
- Faster access to critical archived information when needed
- Improved organizational agility through streamlined data management
- Minimize impact on production systems with safe data offloading
- Support cloud transformation and modernization initiatives
- Empower better decision-making with accessible historical data
- Extend data value by integrating intelligence into archived sets
- Enhance security through defense-grade archive controls
- Future-proof data governance with scalable, adaptable strategies

Constraints

Requires access to core data sources and stakeholder input; solution scope may depend on current infrastructure readiness.
