

Capability	Essentials	Plus	Complete
	Establish the baseline for data protection and secure AI, with tools to increase visibility, eliminate low-value data, and streamline data management.	Drive operational agility and scale AI-ready data protection with automated workflows, agentic AI governance, and centralized insights across your environment.	Enact a strategic approach to data security to mitigate risks and drive AI transformation, leveraging user insights and a clean, compliant data foundation.
ROT Analysis Actionable insights to identify ROT, optimize storage and inform governance.	5 scans	5 scans	5 scans
Risk Insights Uncover hidden risks and behaviors to optimize data governance and compliance.	X	X	X
Policy Enforcement Policy recommendations and automated enforcement to reduce risk, ensure compliance and streamline governance.	X	X	X
MyHub for Data Owner Engagement Centralized workspace management to establish shared accountability.	X	X	X
Copilot Analytics Benchmark adoption and productivity with daily insights on usage and prompt activity and executive-level reporting.	X	X	X
AI & Agent Observability AgentPulse & AI Confidence Command Centers give actionable visibility on AI & Agent usage, shadow AI discovery, risk, cost control and more.	X	X	X
Automated Governance Reduce risk and workloads with streamlined provisioning, lifecycle, and management. AI-driven automated ownership identification.		X	X
Delegated Administration Scalable, role-based access controls to de-centralize IT operations while maintaining security and auditability.		M365 or Power Platform	M365 and Power Platform
Copilot Studio Agent Governance Ensure secure, scalable deployment and ongoing management of Copilot Studio Agents.		Requires Power Platform Source	X
License Optimization Identify underused licenses and automate renewals to align spending with license usage driven by user analytics		X	X
Storage Optimization Reduce costs and clutter by archiving ROT data, improving search, compliance and AI accuracy.		2 TB	10 GB per user
User Analytics Deep insights into user adoption, engagement, and collaboration patterns to drive stronger governance, security, and ROI.		SharePoint & Teams	Complete M365 Coverage (SharePoint, Teams, Calling, OneDrive, Pages, Pulse, Viva Engage)
Information Lifecycle Management Manage data from creation to disposal with policy-based automation, supporting compliance and governance.			X
