

Take Control of Your Data

Manage and minimize workspace risk with the Confidence Platform

Better insights to drive better governance

IT teams struggle to ensure digital workplace infrastructure is secure, compliant and ready to support business goals, and manual oversight doesn't scale. From productivity to secure AI implementation, organizations require scalable, sustainable governance and data security embedded into daily workflows.

AvePoint's Control solutions equip IT with actionable insights, automated data governance, and proactive policy enforcement to reduce security risk, ensure compliance, and drive operational efficiency, without restricting business agility or requiring disparate tools.

Scale and control digital collaboration

Secure, AI-Confident Collaboration

Establish a foundation that can scale AI success by pinpointing data vulnerabilities, closing security gaps, automating protection, and keeping your critical assets safe.

Involve Users to Achieve Compliance

Engage users in a frictionless employee experience with a service-optimized model, while equipping IT to easily set up guardrails for ongoing compliance.

Improve Operational Efficiency

Streamline IT operations with smart lifecycle management to keep digital sprawl in check. Gain visibility, manage, and automate workspaces across multiple platforms.

Powered by AvePoint's Confidence Platform

The platform makes it easy to derive insights and take actions right away, which is critical in today's fast-paced, digital environment. With this combination, AvePoint enables us to focus on VEKA's business needs."

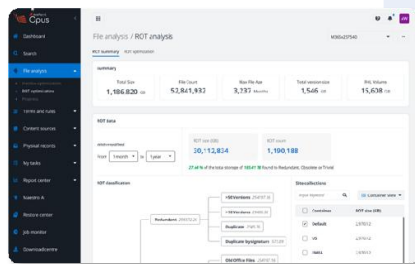

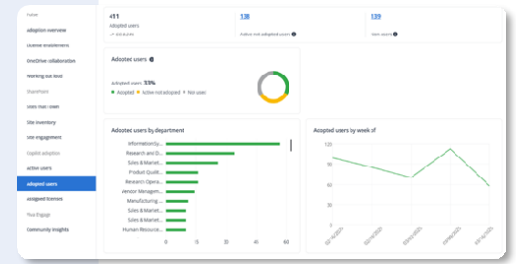

- Dean Surig, IT Project Manager, VEKA Group

Identify, prioritize and remediate risk hiding in your data

Establish the baseline for data protection and secure AI, with tools to increase visibility, eliminate low-value data, and streamline data management.

Agentic and Generative AI Observability

Prevent shadow AI with agent discovery and centralized insights into usage, pay-per-use costs, risk, and knowledge sources across your environment. Benchmark Copilot adoption and monitor prompts to identify risky usage, elevate successful use cases, identify key trends, and maximize ROI.

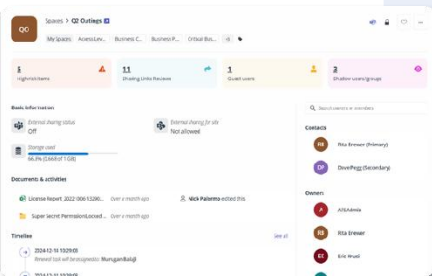

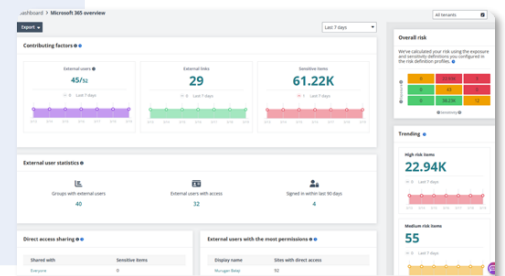

Discovery and Analysis Scans

Scan your environment to identify redundant, obsolete, and trivial (ROT) data that's driving up costs, clouding your AI, and creating unnecessary risk. Take steps to decrease spend, reduce risk, and tighten data quality with actionable insights.

Insights for High-Priority Fixes

Easily find at-risk sensitive data across your ecosystem, and prioritize high-importance fixes for permissions, membership, and sharing controls with our priority matrix.

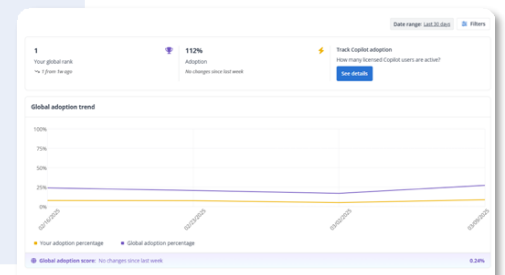

Data Owner Engagement

Empower your data owners to take direct control of the security and classification of their data. Establish a shared accountability model that strengthens security posture, reduces IT burden, and builds a culture of responsible data management that scales.

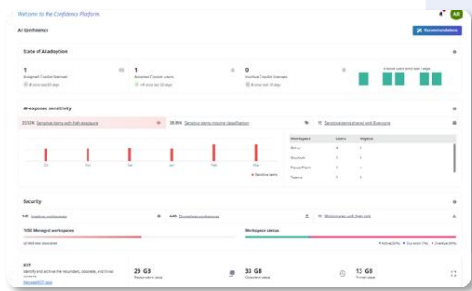

Policies for Efficient Governance

Establish policies that reduce duplicative work through automation. Ensure governance policies are met with end user-driven tools for data protection, administration, and reporting that can flex to support your workplace transformation.

Implement the right controls

Drive operational agility and scale AI-ready data protection with automated workflows, agentic AI governance, and centralized insights across your environment.

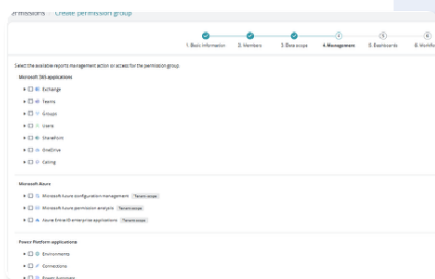

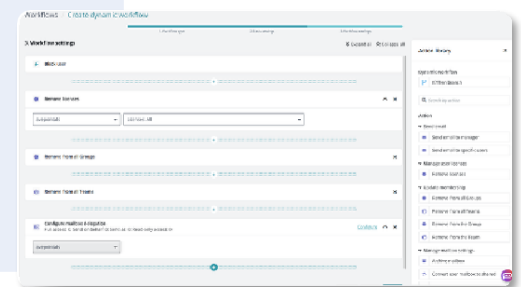

Confidence Command Centers

Leverage purpose-built views of critical business issues like AI adoption, cyber risk, regulatory compliance, and more. Get recommendations on corrective action you can take within the Confidence Platform to keep your organization moving forward.

Security & Governance Workflows

Build a modern IT operation that can pivot as your digital workspace expands. Automate dynamic workflows for common IT tasks to reduce overhead, and augment end user engagement with AI-assisted tools. Manage every workspace and object without missing a beat.

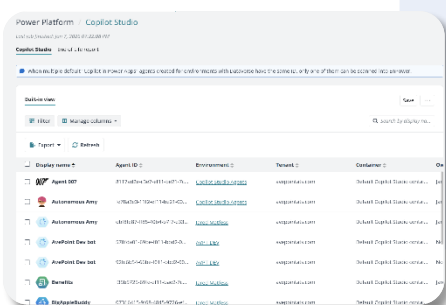

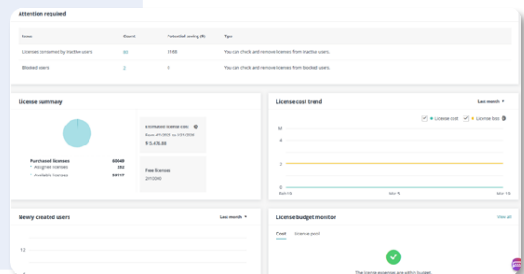

Delegated Administration

Decentralize IT operations without compromising security. Assign granular permissions to enable local teams to manage users, settings, and content while maintaining centralized oversight, auditability, and policy enforcement.

Storage & License Optimization

Optimize your organization's spending with insights and automation. Leverage license analytics to understand ROI and make informed decisions about license allocation, and move low-value content to cost-effective storage.

Agentic Governance

Govern agents as you would an employee. Control agent access and permissions, and enforce automated lifecycle management to continuously monitor agents. Ensure they are up to date and driving value, reducing sprawl and minimizing risk.

Get the most from your SaaS investment

Enact a strategic approach to data security to mitigate risks and drive AI transformation, leveraging user insights and a clean, compliant data foundation.

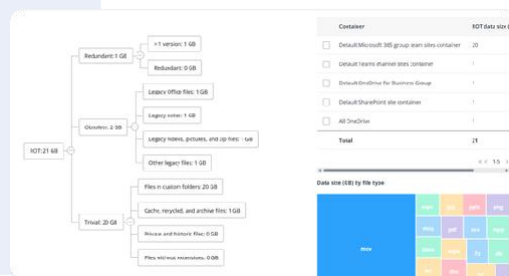

Data Classification

Get your data AI-ready with automated AI-assisted tagging, ensuring accurate and consistent data classification with less manual effort. Streamline AI implementation, make it easier to apply policies, and easily surface the right information across your environment.

Information Lifecycle Management

Keep your environment clean, compliant, and clutter-free as your organization scales. Enforce automated policies to ensure that your information lives, moves, and retires exactly when it should, proactively reducing risk and storage costs.

User Analytics

Unify behavioral insights across your Microsoft 365 ecosystem to proactively identify security gaps and drive ROI. Correlate deep activity data—from SharePoint heatmaps to Copilot prompt trends—to transform usage metrics into an actionable roadmap for secure data governance and efficiency.

Beyond Secure. AvePoint Secure.

AvePoint is the global leader in data security, governance, and resilience, going beyond traditional solutions to ensure a robust data foundation and enable organizations everywhere to collaborate with confidence. Over 25,000 customers worldwide rely on the AvePoint Confidence Platform to prepare, secure, and optimize their critical data across Microsoft, Google, Salesforce, and other collaboration environments. AvePoint's global channel partner program includes approximately 5,000 managed service providers, value-added resellers, and systems integrators, with our solutions available in more than 100 cloud marketplaces.
