

Solution Brief

BlueVoyant Supply Chain Defense

Comprehensive, highly configurable third-party cyber risk management

Technology enabled, expert driven, measurable risk remediation

With BlueVoyant Supply Chain Defense, your organization has the ability to seamlessly assess third-party cyber risk across your entire vendor ecosystem, efficiently manage and prioritize your program activities and, most importantly, remediate risk.

BlueVoyant's end-to-end solution features expert-curated risk monitoring and directed remediation, driving faster and more accurate mitigation of threats. Additional capabilities include a highly customizable questionnaire management platform, multiple levels of continuous monitoring for different tiers of vendors, and point-in-time vendor risk assessments to support procurement and M&A decisions.

All SCD offerings can be enhanced with expert third-party cyber risk management consulting and support for questionnaire response and evidence assessment.

Solution Set Highlights

- > Visibility and prioritization of your entire third-party ecosystem via validated mappings of externally-facing digital infrastructure
- > Continuous monitoring of third parties with guided remediation by Risk Operations Center analysts for faster mitigation of risk and measurable risk reduction
- > Identification and notification of Zero-Day vulnerabilities in as little as 90 minutes following disclosure
- > Monitor the full breadth of vendors you previously could not, regardless of criticality or resource constraints, with automated continuous monitoring
- > Unique capability to validate vendor questionnaire responses while providing an automated platform for storing and managing cyber and risk questionnaires
- > On-demand, easy-to-understand snapshots of acquisition or procurement targets' cyber risk posture

Supply Chain Defense Offerings

A single configurable solution set to meet your third-party cyber risk management needs

Monitoring and Remediation

Curated Monitoring and Directed Remediation

The industry-leading, end-to-end third-party cyber risk solution that leverages continuous external monitoring and expert analyst curation of critical vulnerability findings.

High Volume Monitoring

Automated cyber risk visibility through extensive data feeds that provides continuous monitoring of lower-priority vendors.

Point in Time Cyber Risk Assessments

Pre-Procurement Reports

Informed, sound procurement decisions with intuitive cyber risk reports.

Due Diligence Reports

Gain comprehensive visibility and uncover costly cyber risks in acquisition targets in days, not weeks.

BlueVoyant Supply Chain Defense

Vendor Risk Program Consulting

Client Advisory Workshops

Benefit from expert-led consultative workshops to help mature your organization's approach to third-party risk management.

Vendor Cyber Risk Consulting

Expert, tailored third-party cyber risk management consulting and/or ongoing support for managing questionnaire responses and evidence assessments.

Questionnaire Management

Questionnaire Response Validation

A streamlined, customizable vendor questionnaire platform, with advanced analytics for validating vendor assessments.
