

1 G CLOUD 15

1.1 Microsoft Azure Pricing

Microsoft Azure pricing can be calculated by G Cloud buyers through the creation of an estimate using Microsoft Azure's pricing calculator tool, which can be accessed on the following link:

<https://azure.microsoft.com/en-gb/pricing/calculator/>

Using the Azure calculator tool, buyers can browse the full range of Azure services and select those they are interested in purchasing by clicking the "add to estimate" button, as illustrated below.

This will add the service to the buyer's estimate, which appears at the bottom of the page. Here, the buyer can adjust the service characteristics to create a tailored service based on their needs:
