

PRODUCT OVERVIEW

HYBRID PLATFORM ASSET DISCOVERY SERVICE

Our Hybrid Platform Discovery Service reveals what's running across your on-premises and cloud environments, mapping assets and dependencies to support smarter decisions and reduce risk.

Challenge: Even with visibility, organisations struggle to keep pace with change, ensure data accuracy and align infrastructure with evolving business goals – leading to missed opportunities for optimisations and transformations.

UNCOVER COMPLEXITY IN YOUR HYBRID INFRASTRUCTURE – DISCOVER, MAP AND OPTIMISE.

Solution: We offer a structured discovery service that maps your hybrid environment – including assets, dependencies, and lifecycle states to provide clarity and enable smarter decisions.

Overview: CDW's solution is a discovery led service that maps your entire estate and resources to gain an insight-driven assessment to see what's running, how its connected, and where the risk lies.

Features

Asset Discovery

Automated discovery of resources, applications, servers, storage and network components.

Dependency Mapping

Identification of relationships between resources, applications, infrastructure.

Lifecycle and Support Status

Analysis of asset age, supportability, and end-of-life status.

Transformation

Evaluation of infrastructure resources and workloads for modernisation potential.

Risk Insights

Highlights for unsupported platforms, misaligned configurations or security exposure.

Executive Insights

Structured output and strategic recommendations that supports confident decision making for leadership.

BENEFITS

- **Improved Visibility and Control:**
Gain a clear, accurate view of all assets and dependencies across on-premises and cloud – eliminating guesswork.
- **Reduced Risk of Outages and Failed Changes:**
Understand critical dependencies to avoid disruption during migrations, upgrades or transformations.
- **Smart Decision Making:**
Use trusted data to prioritise investments, modernise with confidence, and align with IT business goals.
- **Lower Costs Through Optimisation:** Identify redundant, underutilised, or unsupported assets – enabling cost savings and efficiency gains.

THE CDW DIFFERENCE

CDW, recognised as the world's leading value-added reseller, offers managed solutions and professional services on a global scale. CDW is an exemplary partner for your business journey. With certified experts specializing in various vendors and solutions, we deliver comprehensive professional services aimed at optimising, assessing, and enhancing your environments. This empowers customers to drive business transformation confidently and enables data-driven decisions and outcomes.
