

Premium Protection Cloud Gateway

In today's complex cybersecurity landscape, protecting collaboration requires comprehensive solutions. Mimecast Premium Protection offers the highest level of defense, combining advanced threat protection, extended data retention, and collaboration security for platforms like Teams, OneDrive, and SharePoint. Operating across cloud, on-premises, and hybrid environments, Premium Protection delivers unparalleled security and continuity, ensuring your business is resilient against cyber threats. Trusted by over 27,000 customers, Mimecast provides robust solutions to safeguard communications, data, and collaboration across your organization.

The Premium Protection Plan includes

Email Security - Improve email security efficacy, protecting the #1 threat vector from attacks including business email compromise, ransomware, and phishing.

Internal Email Protect - Advanced detection applied to all email traffic extends security to internal and outbound email to identify compromise and reduce impact for you and your supply chain. Rapid automated remediation with a single dashboard with no PowerShell required for manual intervention.

Advanced BEC - Leverage industry-leading AI to defend against sophisticated business email compromise and impersonation attacks.

Browser Isolation - Integrated, agnostic Browser Isolation providing 100% protection for advanced web threats delivered via email covering all browsers and devices.

Sync & Recover - Fast, easy data restoration makes it easy to recover from data loss and corruption from a secure and independent source.

Continuity - Maintain 100% email uptime to keep your #1 communication tool available even when Microsoft is not with integrated applications and event management.

Collaboration Threat Protection - Protect OneDrive, SharePoint, and Microsoft Teams, ensuring safe file sharing, communication, and collaboration across your organization.

Content Security - Enable secure collaboration with tools like Large File Send for safe file sharing, Secure Messaging for encrypted communications, and the Privacy Pack to protect sensitive data and ensure compliance.

¹Collaboration Security Protection requires Microsoft 365 E5 licensing
²Large File Send, Secure Messaging, and Privacy Pack

Recommended Add-Ons

- DMARC Analyzer**
 Increase visibility and governance over your domains with easy-to-use reporting and analysis of who is sending email on your behalf to identify legitimate versus fraudulent senders.
- Engage**
 Engage your employees in security with micro-learning modules and phishing simulations.
- Mimecast Cloud Archive**
 Simplify long-term data management, compliance, eDiscovery, and case review.
