

Service Definition

G-Cloud 15

We are LA International.

Company Background

LA International is the sector's only Enhanced Government Accredited supplier, with more than 40 years of UK digital and technology resourcing expertise. Our services are underpinned by proven delivery to public sector clients, year-on-year growth, and a strong cash position.

Security-Clearance and Vetting

With a dedicated Security Vetting Division and access to the UK's largest pool of security-cleared specialists, we provide public sector organisations with fast, compliant and cost-efficient resource deployment.

Service Specialisations

We deliver Digital and Technology Resourcing, Project Solutions, and Managed Services, tailored to meet each client's specific requirements.

Certifications and Compliance

We are certified to ISO 9001, ISO 20000, ISO 27001, and Cyber Essentials Plus, ensuring robust quality, service management, and information security. Our governance expertise supports secure, scalable solutions for all delivery timelines.

Innovation and Agile Methodologies

Agile, iterative delivery and modern cloud-ready technologies ensure continuous improvement and better user outcomes.

Reliable and Cost-Effective Solutions

We provide reliable, cost-effective technology solutions that meet public sector requirements and are delivered on time and within budget.

Social Responsibility

As a signatory of the Armed Forces Covenant, we actively support veterans, service families, and wider communities. Our Social Value and CSR team delivers projects and activities aligned to Social Value Themes and Missions.

Relationships and Client Tenure

With hundreds of clients across Defence, Police and Law Enforcement, National Security, Central and Local Government, Health, and Higher Education, we maintain long-standing relationships with an average tenure of over 10 years.

Impact on Strategic Goals

Our services help public sector organisations deliver on strategic priorities through secure, efficient digital delivery. We also support wider government goals by increasing diversity in technology roles and contributing to sustainability outcomes in line with national policy objectives.
