1. Pricing

1.1. Service Summary

CGI's Managed Network Services deliver a robust, end-to-end solution for organisations seeking reliable, secure, and expertly managed network infrastructure. This service is designed to meet the needs of distributed enterprises, combining 24x7 monitoring, operational support, configuration management, and expert engineering, all aligned with industry best practices and ITIL-based service delivery.

Through our UK-based Digital Command Centre, CGI offers seamless support for a wide range of network environments, whether physical, virtual, or cloud-hosted, with a focus on service continuity, operational excellence, and client value.

Pricing Table

Summary of Pricing Parameters Illustration	Total Annual Price (£)
Managed Network Services scenario priced here, for illustrative purposes is based on a typical mid-sized enterprise scenario comprising: • 2x Data Centres hosting core infrastructure • 25x Branch Sites with resilient WAN connectivity • 2x Firewalls per Data Centre (high availability configuration) • 2x WAN Routers per Site (for branch and data centre resilience) • Over 100 Network Switches supporting stacked and redundant configurations • Over 200 Wireless Access Points across all locations • Wireless LAN Controllers to centralise wireless policy and performance • Network Access Control (NAC) and Identity & Authorisation platform integrated across the estate. ** The pricing aligns to the detailed service descriptions explanation. The service description provides a more comprehensive summary of what is supported, included and not accounted for in this illustrative example. ** The Supplier can provide multiple illustrations and scenarios-based pricing for the G-Cloud customers specific requirements and unique parameters. This price represents 1 year, (12 month) engagement	£107,210.00

Scenario-Based Pricing Model

To illustrate the scope of our services, the pricing model here is based on a typical mid-sized enterprise scenario comprising:

- 2x Data Centres hosting core infrastructure.
- 25x Branch Sites with resilient WAN connectivity.
- 2x Firewalls per Data Centre (high availability configuration).
- 2x WAN Routers per Site (for branch and data centre resilience).
- Over 100 Network Switches supporting stacked and redundant configurations.
- Over 200 Wireless Access Points across all locations.
- Wireless LAN Controllers to centralise wireless policy and performance.
- Network Access Control (NAC) and Identity & Authorisation platform integrated across the estate.

This representative model is designed to help clients understand the level of service and support CGI provides in a fully managed network environment.

1.2. CGI Pricing

CGI offers a flexible pricing model that is typically based on the number of devices, sites, and users managed, factoring in physical, virtual, and cloud-hosted elements.

This pricing provides clients with an outline of our annual support costs based on a specific volumetric scenario. Our support package includes:

- 24x7 Monitoring delivered from our Digital Command Centre in South Wales.
- Backing by a dedicated 3rd Line Engineering Team, including on-call cover.
- Incident resolution aligned to our published SLAs.
- Vendor technical escalation management for all supported platforms.
- Vulnerability patching and firmware upgrades for managed devices.
- Configuration backup and recovery.
- Documentation and network asset updates as part of ongoing operations.
- Monitoring tool licences included for the defined managed estate.

1.3. Exclusions & Customisations

Please note the following items are not included in this pricing outline:

- Network appliances (e.g., routers, firewalls, switches, access points) – scoped and priced on a customer-specific basis.
- Software licensing and hardware support – scoped and priced on a customer-specific basis.
- WAN underlay services – pricing is dependent on circuit type, required bandwidth, location, and carrier availability.
- Professional services for design and deployment – priced separately based on the scope and complexity of each engagement.
- On-site support for hardware replacement or intervention – not included as standard; this is dependent on client requirements and may be delivered via separate engagement or customer resources.

1.4. Why CGI?

CGI brings decades of experience in managing secure, mission-critical networks for clients across public and private sectors. Our services are backed by industry-certified professionals, enterprise-grade toolsets, and a commitment to proactive service excellence.

Whether you're modernising your existing network or building a greenfield digital foundation, CGI's Managed Network Services are tailored to support your journey, securely, reliably, and cost-effectively.
