1. About Mastek

Mastek has been delivering Critical National Infrastructure programmes in the UK Public Sector for over a decade now. We are trusted with multiple contracts for the UK Government across Central Government, Health, Local Government, Policing, Public Protection and Defence. The majority of our national services are delivered in a context of high uncertainty and complexity while collaborating in multi-supplier environments.

While working for these large and complex public sector organisations, we have continuously refined our management, delivery and underlying processes to reflect key learnings from the sector:

Working through a complex stakeholder landscape: We understand the importance of establishing effective communication channels, building trust and fostering a collaborative working environment that empowers stakeholders to contribute meaningfully to the project's success. Our approach is grounded in a thorough understanding of stakeholder needs and requirements. We leverage our experience and expertise to design governance structures that promote transparency and accountability, utilising data-driven reporting mechanisms to ensure stakeholders have real-time visibility into project status and progress. At the Home Office, GDS, Ministry of Defence and NHS, we have a proven track record of working seamlessly with large stakeholder groups, including civil servants.

Standards and compliances: We comply with over 20 policies and standards, including Government Digital Standards and the Government CDDO Service Toolkit, which covers service standards, service manuals, TCoP, API technical and data standards. Our stringent governance, methods, playbooks and processes (both manual and automated) span across service delivery phases, ensuring continuous compliance.

Policy-driven: Policies and procedures primarily drive Public Sector organisations. We need to be Agile and flexible to meet demands for policy/regulatory changes, geopolitical events and ministerial commitments.

Culture: We adhere to the Civil Service core values of integrity, honesty, objectivity and impartiality. Key behaviours we promote stem from a combination of Civil Service and Mastek values. These include being passionate, accountable, sustaining predictable and repeatable outcomes, not transferring risk, being transparent, leading to enablement, acting with transparency, practising a no-blame culture and being flexible.

Did you know?

75%

Around three quarters of Local Authorities in the UK who run Oracle have worked with Mastek on their digital transformation journey.

300,000 Users

Supported managing up to 750,000 logins per month to MOD through Identity and Access Management

Crime reduction

We designed, built and manage the UK's Strategic National DNA Database that helps Forensics and Law Enforcement Authorities investigate and stop crime

90% faster

We enabled the National Health Service (NHS) to drive 90% faster response times with a billion pharmacy prescriptions a year.

Technical Service Desk

We provide level 2 and ITSM support for the One Login service at Government Digital Service

22k

Our systems enable 22,000 schools to function efficiently every day of the year.

Healthcare and manufacturing

We delivered Finance, HCM and Supply Chain transformations for clients across health and manufacturing globally powered by Oracle Cloud

Transformation of trade

Transforming UK's trade with the EU and rest of the World by supporting Customs Declarations Services and its trade users.

99.99% Availability

We support the Home Office Biometrics (HOB) Platform, Having migrated it to an AWS platform.

Our digital and cloud services portfolio

Powered by Glide 4.0 and value-based delivery

Industry-aligned approach with business outcomes

Digital engineering and experience	• Cloud engineering and migration • Legacy modernisation • Low code / no code App Dev • DevSecOps • Enterprise integration	• MACH • Digital commerce • UX and CX • Platform engineering • Gen AI software development.
Oracle Cloud and enterprise apps	• Oracle Cloud applications • Oracle consulting • Oracle Cloud infrastructure	• Value-based delivery • Glide 4.0.
Data, automation and AI	• Cloud data modernisation • Business Intelligence and Analytics	• Data management • Intelligent automation • Data Governance.
Salesforce	• Sales Cloud • Service Cloud • Marketing Cloud • Industry Cloud	• Experience Cloud • Mulesoft.
Innovation labs and platforms	• Enterprise workforce scheduler • Connected enterprise • icx-Pro – intelligent part assistant	• iLeaseFinPro.
Cloud enhancement managed services	• Oracle managed services • Digital managed services • Commerce managed services	• Salesforce managed services.

Home Office Biometrics (HOB)

Public sector platform modelled 24x7 with 99.99% availability

Problem

- Transition business-critical Platform services from incumbent supplier with minimal risk
- Migration from private cloud to AWS Cloud.

Solution

- Migrated the infrastructure from private cloud to AWS
- Embedding Kubernetes Containerisation
- Introduced Docker and fully-baked AMIs
- Supporting the platform's self-service functionality using Jenkins Jobs
- Applying security updates to the OS base images through pipelines
- Instituting automated patching and testing for infrastructure images
- Support of configuration, test and releasable artefacts through the pipeline.

Outcome

- **Zero impact** on live service
- **80% automation** of SIT
- Environment Provision **2 days to 1 hour**
- **5x scalability** in handling student BRPs
- Cost saving the authority circa **£9.5m/year.**
- Won the '**Best Use of Cloud Services**' award
- **35%** Incident Volume Reduction.

Government Digital Service

Problem

GDS initiated the One Login programme to create a single front door for identity verification and authentication, which could be adopted and scaled across all government departments. This would improve the user experience by providing the public with a single identification and verification service for the government, reduce costs as each department no longer required its own identity service and reduce identity fraud and identity-enabled crime.

GDS released a tender in June 2023 to provide a Technical Service Desk (TSD) managed service for the One Login service. This service would provide a single point of contact for level 1 and 2 service support as part of the wider support ecosystem. It would be provided in the UK and replace the incumbent's scaled-down non-ITIL-aligned break-fix service.

Solution

In September 2023, Mastek were successfully awarded the TSD contract to deliver TSD on behalf of GDS. GDS had an extremely aggressive programme driven by the onboarding of HMRC as a user, which was a major milestone planned for February 2024, migrating new and existing HMRC users to the One Login platform. The TSD service was expected to go live in November 2023. This was an extremely complex programme which, within this timescale, would deliver:

- The contact centre provider for level 0 directly facing the public
- The TSD supplier in place, directly facing all government departments
- The TSD supplier in place providing L1 and L2 engineering support and monitoring
- Continued delivery on the One Login backlog of features
- Continued migration of smaller government departments to the platform.
- Delivery of a new ITSM toolset to be configured for use by GDS and the One Login programme, integrating level 0 to level 3 support
- Working as one team, Mastek quickly integrated into the programme, appointing the leadership team early in the engagement. We collaborated with GDS from the outset, ensuring we tailored the service to their expectations rather than delivering what was written in the contract.

Our leadership team consisted of:

- Service Management Vice President
- Programme Director
- Chief Technology Officer
- Programme Management office lead.

Outcome

At its height, the programme team was circa 15 strong, covering programme/project delivery, PMO, architecture, fraud, security, support, omni-channel and quality assurance. The service team is currently in place, providing circa 21 resources now covering end-to-end service management, service delivery and L1 and 2 engineering roles.

As the One Login migrations continue, Mastek is supporting Government departments onboarding to the platform as they transition into the new service and provide One Login a secure Technical Service Desk managed service with:

- Omni-channel access for other government departments via telephony, email and web form
- Provision of L1 and L2 engineering support
- 24x7, 365 days a week cover
- 24x7x365 eyes on monitoring service
- Fraud detection and security, GDPR compliant
- End-to-end (L0-3) incident and problem management
- End-to-end 24x7 Major incident management (MIM)
- On-call/call-out engineering support, incident and MI management
- Adherence to stringent SLAs on incident response, call handling and fix times
- End-to-end monthly service reporting alongside TSD KPI and SLA reporting.
- A shift left culture and mindset, reducing the impact of service on product teams (L3)
- Support with service maturity in the programme, preparing GDS to run critical national infrastructure.

Internet-facing platform and applications for Army Digital Services

Developed mobile app and web app with 24*7 high availability

Problem

- New Defence Gateway Portal
- Combine all internet-facing applications into one
- Easy to use
- Enable easier access to the MySeries portfolio of products.

Solution

Designed and developed the following easy-use Progressive Web Apps:

- Defence Gateway Landing Page
- My Leave App
- My Expenses App
- My Health App
- My Details App
- My Appraisal App
- My Admin App
- COVID-19 Reporting Tool
- Commanders' COVID-19 Tool.

Outcome

- Delivered 20+ successful projects
- Deployment Automation
- £7.5m in savings annually
- Zero Downtime
- Environment creation in hours.

Delivered a platform for the Department for Health and Social Care

Delivered capability supporting 200k+ tests in a day,
traced millions of COVID-19 infections

Problem

- Leveraging DevOps platform based on reusable GitHub, AWS and Azure DevOps Pipelines
- Introduce more flexible, scalable and reusable IaC capabilities
- Implement CI/CD pipelines.

Solution

- Uplifted from Cloud Formation into Terraform (IaC)
- Pre-built the AMIs using Packer, with automated security checks
- Immutable infrastructure, thus eliminating the risks of partial upgrades and patches
- Continual Cost Optimisation processes and other service functions, such as Change and Risk management
- Migrated into an organisation-wide collaboration toolset. This included Jira, Confluence, Trello, Miro, Teams, SharePoint, O365, Slack, etc.

Outcome

- 75% reduction in lead time due to pre-built AMIs
- Zero Downtime Deployments
- Delivered a Platform - Secured, multi-tenanted, hosted on Azure and AWS in 5 weeks
- Cost reduction achieved through close monitoring of resource utilisation.

Mastek and Technology in the Public Sector

Technical Capabilities	Relevant Technology Capability	Mastek Scale
Software Development Continuous Integration, Platform - Other Products, Cloud Collaboration Tools		Software Engineering 2354 FTE
QA and Test ; API, Automated Functional and Compatibility, Accessibility & Performance		QA and Testing 774 FTE

2. Summary

As a Summit-level Salesforce systems integration partner, Mastek focuses on customers looking to leverage Salesforce CRM, Agentforce A.I. and Industry Cloud solutions to unify data and processes across their entire enterprise. We specialise in simplifying digital solutions for customers to reduce complex integrations and unify multiple cloud platforms.

We are customer-led service experts who take service to a whole new level, partnering to deliver excellence for all our customers.

With our proven Roadmap to Results process, our team adds their expertise to your team to craft innovative solutions that answer your organisation's operational challenges today and grow as you grow.

Our digital application and engineering services help our clients achieve their digital journey at speed and with scale. We provide industry-specific, omnichannel, multi-cloud Salesforce expertise and system integration expertise across all Salesforce capabilities, from Sales Cloud to Agentforce, as well as MuleSoft to Informatica.

We provide services to build API ecosystems, modernise legacy systems with new-age digital technology platforms using micro-services, migrate to cloud platforms and ensure quality delivery with Agile service methodologies and an integrated DevSecOps approach.

3. Mastek's Service

At Mastek, we design, implement and operationalise Tableau analytics platforms and solutions for UK public sector organisations, covering discovery through delivery, user adoption and ongoing optimisation. We work with Tableau Cloud, Tableau Server and Tableau Desktop, integrating with your data platforms (cloud or on-prem) to create secure, governed dashboards, metrics and self-service analytics.

Our service focuses on:

- A robust Tableau architecture aligned to security, governance and performance requirements.
- A reusable data-to-dashboard delivery pipeline (development, testing, deployment).
- High-quality, accessible and user-centred dashboards and analytics products.
- Sustainable operating model (admin, support, monitoring, content lifecycle, training).

This service can be delivered as a fixed-scope implementation, outcome-based delivery, or as an agile team providing continuous delivery.

4. Key Features

4.1 Visual analytics and interactivity

- Rich charting, drill-down, parameters, set actions and interactivity for exploratory analysis
- Guided analytics with tooltips, story points and navigation patterns
- Executive-ready dashboards and operational monitoring views.

4.2 Self-service analytics with governance

- Certified data sources and “single version of truth” publishing model
- Projects, permissions and content lifecycle controls to balance freedom with control
- Row-level security patterns for departmental or case-based access controls.

4.3 Data connectivity and performance options

- Broad connector ecosystem (cloud warehouses, relational DBs, files, APIs via supported patterns)
- Performance optimisation via:
 - Extracts (including incremental refresh where applicable)
 - Aggregations, indexing strategies, query tuning guidance
 - Workbook optimisation (context filters, data densification controls).

4.4 Tableau Cloud / Server enterprise capabilities

- SSO integration (SAML/OIDC, depending on your setup), SCIM provisioning where available
- Monitoring and auditability: usage tracking, extract refresh status, admin views
- Scalability: site/project design, multi-team segmentation and permission models.

4.5 Trusted insights and data storytelling

- KPI definition workshops, metric governance and consistent “definition of done”
- Data literacy enablement to improve adoption and reduce dependence on specialists

4.6 Accessibility and design quality

- Layout and design standards to support accessibility (colour contrast, clear labelling, keyboard-friendly navigation patterns where feasible within Tableau)
- Consistent dashboard UI kit: typography, spacing, filters and interactions.

5. Business Benefits

- Faster decision-making: role-based dashboards and automated refresh reduce time spent waiting for reports.
- Single version of the truth: certified data sources and agreed KPI definitions improve consistency across teams.
- Self-service analytics with control: empower users to explore data while maintaining governance, permissions and content standards.
- Improved data quality and trust: profiling, reconciliation checks and clear lineage/metadata highlight issues early and build confidence.
- Secure access to sensitive data: least-privilege permissions and row-level security patterns support safe sharing across groups.
- Reduced manual reporting effort: automate recurring reporting and eliminate spreadsheet-heavy processes.
- Better operational performance: near real-time monitoring and exception dashboards help spot issues earlier and act faster.
- Scalable analytics platform: architecture and deployment patterns support growth in users, dashboards and data volumes.
- Higher adoption and value realisation: user-centred design, training and a dashboard “UI kit” drive engagement and reuse.
- Lower total cost of ownership: reusable templates, publishing standards and runbooks reduce maintenance and rework.
- Clear governance and auditability: structured content lifecycle, usage monitoring and audit logs support oversight and compliance.
- Performance and reliability: extract strategy, refresh monitoring and workbook optimisation improve load times and stability.
- Cross-team collaboration: shared projects, curated datasets and consistent definitions enable joined-up reporting.
- Future-ready foundation: integration-ready design supports new data sources, cloud migrations and evolving policy needs.
- Reduced supplier dependency: knowledge transfer, mentoring and operating model setup build internal capability.

6. Technologies, Languages, Methodologies and Vendor Support
