1. About Mastek

Mastek has been delivering Critical National Infrastructure programmes in the UK Public Sector for over a decade now. We are trusted with multiple contracts for the UK Government across Central Government, Health, Local Government, Policing, Public Protection and Defence. The majority of our national services are delivered in a context of high uncertainty and complexity while collaborating in multi-supplier environments.

While working for these large and complex public sector organisations, we have continuously refined our management, delivery and underlying processes to reflect key learnings from the sector:

Working through a complex stakeholder landscape: We understand the importance of establishing effective communication channels, building trust and fostering a collaborative working environment that empowers stakeholders to contribute meaningfully to the project's success. Our approach is based on a deep understanding of stakeholder needs and requirements. We leverage our experience and expertise to design governance structures that promote transparency and accountability and use data-driven reporting mechanisms to ensure stakeholders have real-time visibility into project status and progress. At the Home Office, GDS, Ministry of Defence and NHS, we have a proven track record of working seamlessly with large stakeholder groups, including civil servants.

Standards, compliances: We comply with >20 policies and standards, including Government Digital Standards and Government CDDO Service Toolkit covering service standards, service manuals, TCoP, API technical and data standards. Our stringent governance, methods, playbooks and processes (manual and automated) span across service delivery phases, ensuring continuous compliance.

Policy-driven: Policies and procedures largely drive Public Sector organisations. We need to be Agile and flexible to meet demands for policy/regulatory changes, geopolitical events and ministerial commitments.

Culture: We adhere to the Civil Service core values of integrity, honesty, objectivity and impartiality. Key behaviours we promote stem from a combination of Civil Service and Mastek values. These include being passionate, accountable, sustaining predictable and repeatable outcomes, not transferring risk, being transparent, leading to enablement, acting with transparency, practising a no-blame culture and being flexible.

Did you know?

75%

Around three quarters of Local Authorities in the UK who run Oracle have worked with Mastek on their digital transformation journey.

300,000 Users

Supported managing up to 750,000 logins per month to MOD through Identity and Access Management

Crime reduction

We designed, built and manage the UK's Strategic National DNA Database that helps Forensics and Law Enforcement Authorities investigate and stop crime

90% faster

We enabled the National Health Service (NHS) to drive 90% faster response times with a billion pharmacy prescriptions a year.

Technical Service Desk

We provide level 2 and ITSM support for the One Login service at Government Digital Service

22k

Our systems enable 22,000 schools to function efficiently every day of the year.

Healthcare and manufacturing

We delivered Finance, HCM and Supply Chain transformations for clients across health and manufacturing globally powered by Oracle Cloud

Transformation of trade

Transforming UK's trade with the EU and rest of the World by supporting Customs Declarations Services and its trade users.

99.99% Availability

We support the Home Office Biometrics (HOB) Platform, Having migrated it to an AWS platform.

Our digital and cloud services portfolio

Powered by Glide 4.0 and value-based delivery

Industry-aligned approach with business outcomes

Digital engineering and experience	• Cloud engineering and migration • Legacy modernisation • Low code / no code App Dev • DevSecOps • Enterprise integration	• MACH • Digital commerce • UX and CX • Platform engineering • Gen AI software development.
Oracle Cloud and enterprise apps	• Oracle Cloud applications • Oracle consulting • Oracle Cloud infrastructure	• Value-based delivery • Glide 4.0.
Data, automation and AI	• Cloud data modernisation • Business Intelligence and Analytics	• Data management • Intelligent automation • Data Governance.
Salesforce	• Sales Cloud • Service Cloud • Marketing Cloud • Industry Cloud	• Experience Cloud • Mulesoft.
Innovation labs and platforms	• Enterprise workforce scheduler • Connected enterprise • icx-Pro – intelligent part assistant	• iLeaseFinPro.
Cloud enhancement managed services	• Oracle managed services • Digital managed services • Commerce managed services	• Salesforce managed services.

Home Office Biometrics (HOB)

Public sector platform modelled 24x7 with 99.99% availability

Problem

- Transition business-critical Platform services from incumbent supplier with minimal risk
- Migration from private cloud to AWS Cloud.

Solution

- Migrated the infrastructure from private cloud to AWS
- Embedding Kubernetes Containerisation
- Introduced Docker and fully-baked AMIs
- Supporting the platform's self-service functionality using Jenkins Jobs
- Applying security updates to the OS base images through pipelines
- Instituting automated patching and testing for infrastructure images
- Support of configuration, test and releasable artefacts through the pipeline.

Outcome

- **Zero impact** on live service
- **80% automation** of SIT
- Environment Provision **2 days to 1 hour**
- **5x scalability** in handling student BRPs
- Cost saving the authority circa **£9.5m/year.**
- Won the '**Best Use of Cloud Services**' award
- **35%** Incident Volume Reduction.

Government Digital Service

Problem

GDS initiated the One Login programme to create a single front door for identity verification and authentication, which could be adopted and scaled across all government departments. This would improve the user experience by providing the public with a single identification and verification service for the government, reduce costs as each department no longer required its own identity service and reduce identity fraud and identity-enabled crime.

GDS released a tender in June 2023 to provide a Technical Service Desk (TSD) managed service for the One Login service. This service would provide a single point of contact for level 1 and 2 service support as part of the wider support ecosystem. It would be provided in the UK and replace the incumbent's scaled-down non-ITIL-aligned break-fix service.

Solution

In September 2023, Mastek were successfully awarded the TSD contract to deliver TSD on behalf of GDS. GDS had an extremely aggressive programme driven by the onboarding of HMRC as a user, which was a major milestone planned for February 2024, migrating new and existing HMRC users to the One Login platform. The TSD service was expected to go live in November 2023. This was an extremely complex programme which, within this timescale, would deliver:

- The contact centre provider for level 0 directly facing the public
- The TSD supplier in place directly facing all government departments
- The TSD supplier in place providing L1 and L2 engineering support and monitoring
- Continued delivery on the One Login backlog of features
- Continued migration of smaller government departments to the platform.
- Delivery of a new ITSM toolset to be configured for use by GDS and the One Login programme, integrating level 0 to level 3 support
- Working as one team, Mastek quickly integrated into the programme, appointing the leadership team early in the engagement. We collaborated with GDS from the outset, ensuring we tailored the service to their expectations rather than delivering what was written in the contract.

Our leadership team consisted of:

- Service Management Vice President
- Programme Director
- Chief Technology Officer
- Programme Management office lead.

Outcome

At its height, the programme team was circa 15 strong, covering programme/project delivery, PMO, architecture, fraud, security, support, omni-channel and quality assurance. The service team is currently in place providing circa 21 resources now covering end-to-end service management, service delivery and L1 and 2 engineering roles.

As the One Login migrations continue, Mastek is supporting Government departments onboarding to the platform as they transition into the new service and provide One Login a secure Technical Service Desk managed service with:

- Omni channel access for other government departments via telephony, email and web form
- Provision of L1 and L2 engineering support
- 24x7, 365 days a week cover
- 24x7x365 eyes on monitoring service
- Fraud detection and security, GDPR compliant
- End-to-end (L0-3) incident and problem management
- End-to-end 24x7 Major incident management (MIM)
- On-call/call-out engineering support, incident and MI management
- Adherence to stringent SLAs on incident response, call handling and fix times
- End-to-end monthly service reporting alongside TSD KPI and SLA reporting.
- A shift left culture and mindset, reducing the impact of service on product teams (L3)
- Support with service maturity in the programme, preparing GDS to run critical national infrastructure.

Internet-facing platform and applications for Army Digital Services

Developed mobile app and web app with 24*7 high availability

Problem

- New Defence Gateway Portal
- Combine all internet-facing applications into one
- Easy to use
- Enable easier access to the MySeries portfolio of products.

Solution

Designed and developed the following easy-use Progressive Web Apps:

- Defence Gateway Landing Page
- My Leave App
- My Expenses App
- My Health App
- My Details App
- My Appraisal App
- My Admin App
- COVID-19 Reporting Tool
- Commanders' COVID-19 Tool.

Outcome

- Delivered 20+ successful projects
- Deployment Automation
- £7.5m in savings annually
- Zero Downtime
- Environment creation in hours.

Delivered a platform for the Department for Health and Social Care

Delivered capability supporting 200k+ tests in a day,
traced millions of COVID-19 infections

Problem

- Leveraging DevOps platform based on reusable GitHub, AWS and Azure DevOps Pipelines
- Introduce more flexible, scalable and reusable IaC capabilities
- Implement CI/CD pipelines.

Solution

- Uplifted from Cloud Formation into Terraform (IaC)
- Pre-built the AMIs using Packer, with automated security checks
- Immutable infrastructure, thus eliminating the risks of partial upgrades and patches
- Continual Cost Optimisation processes and other service functions, such as Change and Risk management
- Migrated into an organisation-wide collaboration toolset. This included Jira, Confluence, Trello, Miro, Teams, SharePoint, O365, Slack, etc.

Outcome

- 75% reduction in lead time due to pre-built AMIs
- Zero Downtime Deployments
- Delivered a Platform - Secured, multi-tenanted hosted on Azure and AWS in 5 weeks
- Cost reduction achieved through close monitoring of resource utilisation.

Mastek and Technology in the Public Sector

Technical Capabilities	Relevant Technology Capability	Mastek Scale
Software Development Continuous Integration, Platform - Other Products, Cloud Collaboration Tools		Software Engineering 2354 FTE
QA and Test ; API, Automated Functional and Compatibility, Accessibility & Performance		QA and Testing 774 FTE
Cloud Platforms Amazon Web Services AWS Microsoft Azure		Cloud Platforms 1046 FTE
Data BI/MI Components, Integration		BI and Visualisation 725 FTE
User-Centered Design		UCD 25 FTE
Office Automation Tools		Collaboration 4565 FTE

2. Summary

Enterprise Application Ecosystem Optimisation and Value Realisation is a strategic service designed to maximise the performance, integration and business value of complex application landscapes. This offering enables organisations to assess, rationalise and optimise their enterprise applications, ensuring alignment with business goals, operational efficiency and measurable outcomes. By leveraging advanced analytics, automation and best practices, the service delivers a roadmap for ecosystem transformation, value realisation and continuous improvement—empowering organisations to unlock innovation, reduce costs and accelerate digital transformation.

Figure 1: Enterprise Application Ecosystem Optimisation and Value Realisation

3. Masteks Service

This service provides end-to-end support for optimising enterprise application ecosystems and realising business value. Key elements include:

- **Application Portfolio Assessment:** Comprehensive inventory and analysis of all enterprise applications, platforms and integrations. Evaluation of business fit, technical health, usage, cost and risk.
- **Ecosystem Rationalisation and Optimisation:** Identification of redundancies, overlaps and underutilised assets. Rationalisation of applications through consolidation, retirement, modernisation, or replacement.
- **Integration and Interoperability Enhancement:** Design and implementation of robust integration frameworks (APIs, middleware, event streaming) to enable seamless data exchange, process automation and interoperability across the ecosystem.
- **Value Realisation Roadmap:** Development of a phased, outcome-driven roadmap to optimise application performance, reduce costs and maximise business impact. Alignment with strategic priorities, regulatory requirements and innovation goals.
- **Automation and Process Optimisation:** Deployment of automation tools (RPA, workflow engines, orchestration platforms) to streamline business processes, reduce manual effort and improve efficiency.
- **Analytics and Performance Management:** Implementation of monitoring, analytics and reporting solutions to track application usage, performance and value delivery. Establishment of KPIs, dashboards and continuous improvement mechanisms.
- **Change Management and Stakeholder Engagement:** Facilitation of workshops, training and communication strategies to drive adoption, manage change and ensure sustained value realisation.

4. Key Features

4.1 Comprehensive Application Portfolio Assessment

- Inventory and analysis of all enterprise applications, platforms and integrations.
- Business fit, technical health, usage, cost and risk evaluation.
- Identification of rationalisation and optimisation opportunities.

4.2 Ecosystem Rationalisation and Optimisation

- Consolidation, retirement, modernisation, or replacement of redundant or underutilised applications.
- Alignment of application landscape with business strategy and operational needs.
- Reduction of technical debt and operational complexity.

4.3 Integration and Interoperability Enhancement

- Design and deployment of integration frameworks (APIs, middleware, event streaming).
- Enablement of seamless data exchange and process automation.
- Support for hybrid, multi-cloud and legacy environments.

4.4 Value Realisation Roadmap

- Phased, outcome-driven roadmap for ecosystem transformation.
- Prioritisation of initiatives based on business impact, cost and risk.
- Alignment with strategic priorities and regulatory requirements.

4.5 Automation and Process Optimisation

- Deployment of RPA, workflow engines and orchestration platforms.
- Streamlining of business processes and reduction of manual effort.
- Continuous improvement and operational excellence.

4.6 Analytics and Performance Management

- Implementation of monitoring, analytics and reporting solutions.
- Establishment of KPIs, dashboards and value tracking mechanisms.
- Data-driven decision making and continuous optimisation.

4.7 Change Management and Stakeholder Engagement

- Workshops, training and communication strategies
- Stakeholder mapping, adoption planning and resistance management
- Sustained value realisation and continuous improvement

5. Business Benefits

- **Maximised Business Value:** Unlock hidden value in the application ecosystem through rationalisation, optimisation and alignment with strategic goals.
- **Reduced Costs and Complexity:** Eliminate redundancies, reduce technical debt and lower operational costs by streamlining the application landscape.
- **Enhanced Integration and Agility:** Enable seamless interoperability and rapid response to business needs through robust integration frameworks and automation.
- **Improved Performance and Efficiency:** Optimise application usage, performance and process efficiency with advanced analytics and automation.
- **Accelerated Innovation:** Empower business and IT teams to innovate and adapt quickly by providing a flexible, optimised application ecosystem.
- **Regulatory Compliance and Risk Mitigation:** Ensure compliance with industry standards and regulations through governance, monitoring and continuous improvement.
- **Stakeholder Alignment and Adoption:** Drive successful transformation and sustained value through effective change management and stakeholder engagement.

6. Technologies, Languages, Methodologies and Vendor Support

#	Technologies	Languages	Methodologies	Vendor Support
1	ServiceNow, LeanIX, Flexera, CAST Highlight	Java, .NET, Python, SQL	Application portfolio analysis, technical debt scoring, optimisation	ServiceNow, LeanIX, Flexera, CAST
2	MuleSoft, Apigee, Azure API Management, IBM Integration Bus	Java, .NET, Python, REST, GraphQL	API-led integration, middleware, event-driven architecture	MuleSoft, Google, Microsoft, IBM
3	UiPath, Automation Anywhere, Blue Prism	Python, JavaScript, .NET	RPA, workflow automation, orchestration	UiPath, Automation Anywhere, Blue Prism
4	Power BI, Tableau, Qlik, Looker	DAX, SQL, Python	Analytics, performance management, dashboarding	Microsoft, Tableau, Qlik, Google
5	AWS, Azure, GCP, IBM Cloud	Python, Go, Java, Node.js	Cloud-native architecture, modernisation, migration	Amazon, Microsoft, Google, IBM
6	Jira, Confluence, Azure DevOps	YAML, JavaScript, TypeScript	Agile delivery, roadmap management and change control	Atlassian, Microsoft
