1. About Mastek

Mastek has been delivering Critical National Infrastructure programmes in the UK Public Sector for over a decade now. We are trusted with multiple contracts for the UK Government across Central Government, Health, Local Government, Policing, Public Protection, and Defence. The majority of our national services are delivered in a context of high uncertainty and complexity while collaborating in multi-supplier environments.

While working for these large and complex public sector organisations, we have continuously refined our management, delivery and underlying processes to reflect key learnings from the sector:

Working through a complex stakeholder landscape: We understand the importance of establishing effective communication channels, building trust, and fostering a collaborative working environment that empowers stakeholders to contribute meaningfully to the project's success. Our approach is based on a deep understanding of stakeholder needs and requirements. We leverage our experience and expertise to design governance structures that promote transparency and accountability and use data-driven reporting mechanisms to ensure stakeholders have real-time visibility into project status and progress. At the Home Office, GDS, Ministry of Defence and NHS, we have a proven track record of working seamlessly with large stakeholder groups, including civil servants.

Standards, compliances: We comply with >20 policies and standards, including Government Digital Standards and Government CDDO Service Toolkit covering service standards, service manuals, TCoP, API technical and data standards. Our stringent governance, methods, playbooks, and processes (manual and automated) span across service delivery phases, ensuring continuous compliance.

Policy-driven: Policies and procedures largely drive Public Sector organisations. We need to be Agile and flexible to meet demands for policy/regulatory changes, geopolitical events, and ministerial commitments.

Culture: We adhere to the Civil Service core values of integrity, honesty, objectivity, and impartiality. Key behaviours we promote stem from a combination of Civil Service and Mastek values. These include being passionate, accountable, sustaining predictable and repeatable outcomes, not transferring risk, transparent, leading to enable, acting with transparency, practising a no-blame culture, and being flexible.

Did you know?

75%

Around three quarters of Local Authorities in the UK who run Oracle have worked with Mastek on their digital transformation journey.

300,000 Users

Supported managing up to 750,000 logins per month to MOD through Identity and Access Management

Crime reduction

We designed, built and manage the UK's Strategic National DNA Database that helps Forensics and Law Enforcement Authorities investigate & stop crime

90% faster

We enabled the National Health Service (NHS) to drive 90% faster response times with a billion pharmacy prescriptions a year.

Technical Service Desk

We provide level 2 and ITSM support for the One Login service at Government Digital Service

22k

Our systems enable 22,000 schools to function efficiently every day of the year.

Healthcare and manufacturing

We delivered Finance, HCM & Supply Chain transformations for clients across health and manufacturing globally powered by Oracle Cloud

Transformation of trade

Transforming UK's trade with the EU and rest of the World by supporting Customs Declarations Services and its trade users.

99.99% Availability

We support the Home Office Biometrics (HOB) Platform, Having migrated it to an AWS platform.

Our digital and cloud services portfolio

Powered by Glide 4.0 and value-based delivery

Industry-aligned approach with business outcomes

Digital engineering and experience	• Cloud engineering & migration • Legacy modernisation • Low code / no code App Dev • DevSecOps • Enterprise integration	• MACH • Digital commerce • UX & CX • Platform engineering • Gen AI software development.
Oracle Cloud and enterprise apps	• Oracle Cloud applications • Oracle consulting • Oracle Cloud infrastructure	• Value-based delivery • Glide 4.0.
Data, automation and AI	• Cloud data modernisation • Business Intelligence & Analytics	• Data management • Intelligent automation • Data Governance.
Salesforce	• Sales Cloud • Service Cloud • Marketing Cloud • Industry Cloud	• Experience Cloud • Mulesoft.
Innovation labs and platforms	• Enterprise workforce scheduler • Connected enterprise • icx-Pro – intelligent part assistant	• iLeaseFinPro.
Cloud enhancement managed services	• Oracle managed services • Digital managed services • Commerce managed services	• Salesforce managed services.

Home Office Biometrics (HOB)

Public sector platform modelled 24x7 with 99.99% availability

Problem

- Transition business-critical Platform services from incumbent supplier with minimal risk
- Migration from private cloud to AWS Cloud.

Solution

- Migrated the infrastructure from private cloud to AWS
- Embedding Kubernetes Containerisation
- Introduced Docker and fully-baked AMIs
- Supporting the platform's self-service functionality using Jenkins Jobs
- Applying security updates to the OS base images through pipelines
- Instituting automated patching and testing for infrastructure images
- Support of configuration, test, and releasable artefacts through the pipeline.

Outcome

- **Zero impact** on live service
- **80% automation** of SIT
- Environment Provision **2 days to 1 hour**
- **5x scalability** in handling student BRPs
- Cost saving the authority circa **£9.5m/year.**
- Won the '**Best Use of Cloud Services**' award
- **35%** Incident Volume Reduction.

Government Digital Service

Problem

GDS initiated the One Login programme to create a single front door for identity verification and authentication, which could be adopted and scaled across all government departments. This would improve the user experience by providing the public with a single identification and verification service for the government, reduce costs as each department no longer required its own identity service, and reduce identity fraud and identity-enabled crime.

GDS released a tender in June 2023 to provide a Technical Service Desk (TSD) managed service for the One Login service. This service would provide a single point of contact for level 1 and 2 service support as part of the wider support ecosystem. It would be provided in the UK and replace the incumbent's scaled-down non-ITIL-aligned break-fix service.

Solution

In September 2023, Mastek were successfully awarded the TSD contract to deliver TSD on behalf of GDS. GDS had an extremely aggressive programme driven by the onboarding of HMRC as a user, which was a major milestone planned for February 2024, migrating new and existing HMRC users to the One Login platform. The TSD service was expected to go live in November 2023. This was an extremely complex programme which, within this timescale, would deliver:

- The contact centre provider for level 0 directly facing the public
- The TSD supplier in place directly facing all government departments
- The TSD supplier in place providing L1 and L2 engineering support and monitoring
- Continued delivery on the One Login backlog of features
- Continued migration of smaller government departments to the platform.
- Delivery of a new ITSM toolset to be configured for use by GDS and the One Login programme, integrating level 0 to level 3 support
- Working as one team, Mastek quickly integrated into the programme, appointing the leadership team early in the engagement. We collaborated with GDS from the outset, ensuring we tailored the service to their expectations rather than delivering what was written in the contract.

Our leadership team consisted of:

- Service Management Vice President
- Programme Director
- Chief Technology Officer
- Programme Management office lead.

Outcome

At its height, the programme team was circa 15 strong, covering programme/project delivery, PMO, architecture, fraud, security, support, omni channel and quality assurance. The service team is currently in place providing circa 21 resources now covering end-to-end service management, service delivery and L1 and 2 engineering roles.

As the One Login migrations continue, Mastek is supporting Government departments onboarding to the platform as they transition into the new service and provide One Login a secure Technical Service Desk managed service with:

- Omni channel access for other government departments via telephony, email and web form
- Provision of L1 and L2 engineering support
- 24x7, 365 days a week cover
- 24x7x365 eyes on monitoring service
- Fraud detection and security, GDPR compliant
- End-to-end (L0-3) incident and problem management
- End-to-end 24x7 Major incident management (MIM)
- On-call/call-out engineering support, incident and MI management
- Adherence to stringent SLAs on incident response, call handling and fix times
- End-to-end monthly service reporting alongside TSD KPI and SLA reporting.
- A shift left culture and mindset, reducing the impact of service on product teams (L3)
- Support with service maturity in the programme, preparing GDS to run critical national infrastructure.

Internet-facing platform & applications for Army Digital Services

Developed mobile app & web app
with 24*7 high availability

Problem

- New Defence Gateway Portal
- Combine all internet-facing applications into one
- Easy to use
- Enable easier access to the MySeries portfolio of products.

Solution

Designed and developed the following easy-use Progressive Web Apps:

- Defence Gateway Landing Page
- My Leave App
- My Expenses App
- My Health App
- My Details App
- My Appraisal App
- My Admin App
- COVID-19 Reporting Tool
- Commanders' COVID-19 Tool.

Outcome

- Delivered 20+ successful projects
- Deployment Automation
- £7.5m in savings annually
- Zero Downtime
- Environment creation in hours.

Delivered a platform for the Department for Health and Social Care

Delivered capability supporting 200k+ tests in a day,
traced millions of COVID-19 infections

Problem

- Leveraging DevOps platform based on reusable GitHub, AWS, and Azure DevOps Pipelines
- Introduce more flexible, scalable, and reusable IaC capabilities
- Implement CI/CD pipelines.

Solution

- Uplifted from Cloud Formation into Terraform (IaC)
- Pre-built the AMIs using Packer, with automated security checks
- Immutable infrastructure, thus eliminating the risks of partial upgrades and patches
- Continual Cost Optimisation processes and other service functions, such as Change and Risk management
- Migrated into an organisation-wide collaboration toolset. This included Jira, Confluence, Trello, Miro, Teams, SharePoint, O365, Slack, etc.

Outcome

- 75% reduction in lead time due to pre-built AMIs
- Zero Downtime Deployments
- Delivered a Platform - Secured, multi-tenanted hosted on Azure and AWS in 5 weeks
- Cost reduction achieved through close monitoring of resource utilisation.

Mastek and Technology in the Public Sector

Technical Capabilities	Relevant Technology Capability	Mastek Scale
Software Development Continuous Integration, Platform - Other Products, Cloud Collaboration Tools		Software Engineering 2354 FTE
QA and Test: API, Automated Functional and Compatibility, Accessibility & Performance		QA and Testing 774 FTE
Cloud Platforms Amazon Web Services AWS Microsoft Azure		Cloud Platforms 1046 FTE
Data BI/MI Components, Integration		BI and Visualisation 725 FTE
User-Centered Design		UCD 25 FTE
Office Automation Tools		Collaboration 4565 FTE

2. Summary

Mastek's Robotic Process Automation (RPA) services ensure that all operations across every area of the business are executed faster and at a reduced cost. We enable operational innovations to drive customer experience, speed up execution, and reduce costs, with an emphasis on scale.

Mastek's RPA will enable employees to stop working on repetitive and mundane tasks. Our comprehensive approach includes enablers designed to help enterprises navigate the challenges and opportunities on the automation journey, starting from identifying opportunities to productionise the automation solution and achieve the desired ROI. We collaborate with leading RPA and Cognitive Automation vendors, providing end-to-end RPA solutions.

Figure 1: Ideal processes for RPA implementation

Mastek's Cognitive Process Automation (CPA) is the next stage of automation by which the system can think and interact with the customer or employees using natural language, just like a human agent. CPA aims to mimic human behaviour, such as perceiving, gathering evidence and reasoning and, therefore, the best fit for processes which involve unstructured data from non-standard sources, e.g. Reading customer emails to understand customer queries such as requests for the account statement, then logging on the system to download the requested statement and then emailing the downloaded statement to the client without any human intervention.

The Figure below illustrates the Intelligent Automation spectrum, from basic automation (human augmentation) to deploying AI and human-free processes.

Figure 2: Intelligent Automation Spectrum

3. Masteks Service

Mastek follows a highly Agile approach after the initial Discovery and Proof of Concept (POC) phase.

Discovery

Mastek works with business stakeholders, process owners, and system users to assess, identify, evaluate and prioritise candidate business processes for intelligent automation. The typical deliverables are the initial list of processes for automation, tooling requirements and the POC plan.

Proof of Concept (POC)

Mastek performs the Pilot for a selected process to demonstrate the solution and benefits. Mastek performs the detailed process analysis, ranking each process based on several prioritisation factors. The typical deliverables are Process list/Scoring, High-level Business case and Technology evaluation and selection.

Plan and design

Mastek performs enterprise-wide automation assessment, works with different stakes to refine the business case, finalises the solution blueprint, and chooses the right automation technologies for each process and use case. The typical deliverables are Detailed Business case, Automation Roadmap and Automation Sprints planned.

Implementation

Mastek scales the team to deliver enterprise-wide automation projects. The Mastek team will perform design activities such as Detailed Process mapping, Automation design and Test planning. The development team simultaneously starts configuring the Robots and leverages the pre-configured Robot activities from the Masteks automation library. The team build, test and demonstrate the Robots to end users at regular intervals.

Manage

Finally, the ROBOTS are ready for the end users to accept. Once the client accepts them, they are ready for production. Mastek will perform several pre-production checks before productionising the robots.

Typically, Mastek follows the below delivery model for each potential asset candidate:

Figure 3: RPA phases – end-to-end support

4. Key Features

- Attended Robot
- Unattended Robot
- Orchestrator/Control room
- Optical Character Recognition (OCR)
- Natural language processing
- Computer vision
- Cloud hosting (SaaS/PaaS).

5. Business Benefits

- The human workforce can spend more time on innovations and operational improvements.
- The staff morale improved due to reduced effort on mundane and repetitive tasks.
- Reduces operational costs (20-50 % reduction) and no operational errors.
- Reduces time to deliver products and services (3 to 5 times faster than humans).
- One robot replaces, on average, 2.5 to 4 FTEs.
- Improved customer service and customer experience.
- Quicker ROI as no changes to the existing processes/system are non-invasive.
- Scale the operations immediately without additional human labour.
- Improves compliance and operational metrics collections at the users or process level.
- Availability of services on the new channels such as messenger, Chatbots and social websites.

6. Technologies and Vendor Support

#	Technologies	Vendor Support
1	Attended / Unattended Robot	• UiPath • Automation Anywhere • Microsoft Power Automate
2	Orchestrator / Control Room	• UiPath • Automation Anywhere • Microsoft Power Automate
3	Computer Vision	• Microsoft (https://www.customvision.ai/) • Google (https://cloud.google.com/vision/) • Amazon (https://aws.amazon.com/rekognition/)
4	Optical Character Recognition	• ABBYY • Google (Detect text in images, Cloud Vision API, Google Cloud) • Microsoft (Applied AI services - Microsoft Azure) • Amazon (Intelligently Extract Text and Data with OCR - Amazon Textract - Amazon Web Services)
5	Natural Language Processing	• Microsoft (LUIS (Language Understanding) - Cognitive Services - Microsoft) • Google (Cloud Natural Language Google Cloud) • Google NLP (Dialogflow, Google Cloud) • Amazon (Natural Language Processing – Amazon Comprehend – Amazon Web Services)
