

G-Cloud 15 Service Description

AWS Cloud Centre of Excellence

AWS Cloud Centre of Excellence

Methods' AWS Cloud Centre of Excellence (CCoE) Service helps you establish a best-practice framework to adopt AWS in a secure, efficient and repeatable way. It ensures that you align to the AWS Cloud Adoption Framework (CAF). It establishes baseline capabilities for FinOps, Security, Monitoring and platforms.

What is the Service

Methods will help you establish a Cloud Centre of Excellence to ensure that a gold-standard model of cloud adoption is in place. Methods will work with AWS to provide immersion days to establish a learning culture and a foundational capability. Methods will help you start POCs and discovery activities to start migration processes. Methods will help you establish foundational components of your cloud platform such as IDAM, Security, Landing Zones, Monitoring and common platforms.

What can it do for you

The Cloud Centre of Excellence will ensure you adopt cloud in a secure, efficient and scalable manner. It will lower your TCO and increase your security. It will create an exemplar set of tools and processes that can be adopted for a wider cloud adoption and workload migrations.

Service Features

- 1. Security
- 2. Scalability
- 3. Efficiency
- 4. Establish agile adoption methodologies
- 5. Establish continuous improvement
- 6. Establish an AWS cloud operating model

Service Benefits

- 1. Secure by design
- 2. Scalable hosting platforms
- 3. IAM / IDAM integration
- 4. Cost management through FinOps
- 5. Monitoring and Alerting

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation

Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation

Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)

Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability.** Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement

Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)

Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)

Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
