

G-Cloud 15 Service Description

Project Management

Project Management

Methods provide a Project Management Service with the flexibility to suit all types of projects, from complex change projects to small deliveries. Our scalable service includes project design, delivery, and closure, as well as risk management, communication and stakeholder management, planning and execution.

What is the Service

Methods’ Project Management services involve the detailed initiation, planning and execution of a project, whilst maintaining excellent governance and promoting best practice across stakeholder engagement and change management. Projects are run and closed based on standard approaches such as, PRINCE2, Agile, Six Sigma, Lean, Scrum and hybrid methodologies.

Our approach balances proven methodology with an understanding of what is right for your organisation’s environment, applying approaches tailored to the scale and scope of the project. Through working collaboratively with the project stakeholders, our skilled, and experienced professionals are able to transfer knowledge and skills to build sustainable capabilities in your team, whilst ensuring that all strategic objectives of the project are achieved.

What can it do for you

Benefits of our Project Management service include:

- Management and delivery of quality solutions at pace, maintaining a focus on benefits throughout the project lifecycle
- Alignment of projects to organisational policy and procedures, including internal assurance
- Implementation of best practice project planning techniques and structured PM approach/methodologies, including PRINCE2, Agile, Six Sigma, Lean and/or Scrum
- Provision of highly experienced and qualified specialists in Project Management, including spanning agile, waterfall and hybrid methodologies
- Improvement of project efficiency, consistency, reliability, predictability and quality of outcomes
- Delivery of business continuity and business impact assessments
- Proactive assessment and monitoring of project management risks
- Creation of best practice project management tools and plans, including delivery plans to enable progress monitoring.

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability**. Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
