

G-Cloud 15 Service Description

Data Maturity Assessment

Data Maturity Assessment

Our Data Maturity Assessment approach helps assess your current and aspirational levels of data maturity and develop a clear path to maximising data use across the organisation. This is done by assessing data maturity and providing recommendations on how to optimise and develop the use of organisational data.

What is the Service

The National Data Strategy (2020) set out how public sector organisations could utilise and enhance the use of data assets. Our approach is to support and advise our clients on their current and aspirational levels of data maturity so there is a clear path to maximising data use across the organisation.

This is done by assessing maturity on the four pillars of the NDS and providing recommendations on how to optimise and develop the use of organisational data:

- Data Foundations
- Data Skills
- Data Availability
- Data Flows and Technology

What can it do for you

With our maturity assessment you can measure your organisation's current maturity level against the National Data Strategy pillars. This enables stakeholders to clearly identify strengths and improvement points, aligned to the NDS and your strategic objectives and to prioritise what to do accordingly in order to reach the optimal maturity levels for your organisation.

Service Features

1. Stakeholder identification: SRO, Internal teams, supporters / challengers
2. Review of current data processes
3. Review of current Data sources
4. Review of current Data / technology assets
5. Review of current Business capabilities / policies
6. Define desired future state
7. Gap analysis in data architecture, technology, tools, processes and people
8. Improvement roadmap

Service Benefits

1. Facilitates benchmarking of internal capability
2. Identify gaps in provision
3. Identify gaps in strategic and operational intention
4. Allows for the surfacing and identification of solutions for improvement
5. Becomes a catalyst for service improvement
6. Creates a evolves a common language around data maturity
7. Aligned to National Data Strategy

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability.** Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
