

G-Cloud 15 Service Description

Low Code Solution and Scoping Workshop

Low Code Solution and Scoping Workshop

Methods' Solution and Scoping Workshops leverage the potential of low-code approaches to address organisational needs. Our expertise and collaborative approach transform high potential ideas into actionable plans. Using rapid analysis techniques we can evaluate and refine an approach and develop clear and precise, actionable outcomes and reusable outputs.

What is the Service

The Methods' Solution and Scoping workshop engage local and central government organisations that see explore and the value of low-code platforms in achieving their goals.

The session can be completed in a single day and uses our extensive knowledge of the public sector and a range of interactive tools and techniques to engage a wide range of stakeholders, convert ideas into innovative practical models, build consensus and generate discussion about the application of low code to a specific challenge or area.

What can it do for you

This service offers a cost-effective way to bring together key stakeholders to build consensus and understanding around how low code could be delivered in your organisation. Get a high-level snapshot of the ways that Methods can support your organisation for a small investment and leave the session with clear and precise, actionable outcomes and reusable outputs.

5. Generates discussion and builds consensus with key stakeholders
6. Understand how a development lifecycle discovery works
7. An opportunity to use key techniques with our experienced practitioners
8. Leave the session with clear, actionable outcomes and reusable outputs
9. Collaborative, interactive and engaging for any of your key stakeholders
10. Real time knowledge transfer

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting** overall **service reliability, efficiency, and organisational visibility**.

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability**. Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
