

G-Cloud 15 Service Description

Data Publishing Services

Data Publishing Services

Methods provide specialist teams to design and build user-centred digital services that capture, present, and share data. In our multidisciplinary teams software developers, user researchers and designers work alongside data experts. Our data specialists cover fields such as visualisation, statistical content design, data science and open data strategy.

What is the Service

Methods provides subject specialists with the skills and experience to build user-centred data websites that enhance your data strategy and are compliant with the GDS service standard.

What can it do for you

Data publication services are distinct from general web services. Data publishing requires the researchers, designers and developers to build user-centred digital services. It requires data specialists that can plan the handling and sharing of your data according to open data standards. It needs content teams that can communicate technical information simply and concisely. It may require statistical theory, data science or information security. Since data publication services are distinct from general web services they require a specialist team which Methods can provide.

Service Features

- 1. Data-centric website development
- 2. Statistical content design
- 3. Data visualisation
- 4. Open data strategy
- 5. API development
- 6. Data and content pipeline development
- 7. Secure data handling
- 8. Custom data publishing tools

Service Benefits

- 1. Best practice publication of statistics for public audiences
- 2. Differentiated publishing for all levels of data literacy
- 3. Efficient and streamlined end-to-end publishing processes
- 4. Experienced team
- 5. Compliant with Government service standard
- 6. Increased organisational transparency
- 7. Business process integration for digital and analytic teams

Contact details

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Customer stories

Cloud Hosting & Service Modernisation
Modernised digital services using secure cloud hosting, streamlined legacy workflows, and improved data insights. Delivered faster decisions, reduced manual effort, and a more transparent, **user-friendly experience** for internal teams and external users.

Cloud-Based ITSM Consolidation
Unified multiple service desks onto a cloud-based ITSM platform, standardising processes and automating workflows. Improved incident, change, and problem management, **boosting overall service reliability, efficiency, and organisational visibility.**

Large-Scale Cloud Migration (100+ Apps / 120TB)
Delivered cloud migration of **100+ legacy applications** and **120TB of data** with **100% availability**. Strengthened compliance, improved transparency, and significantly enhanced operational resilience across critical digital services.

Azure Migration & Modern Workplace Enablement
Migrated data centres to Azure and deployed modern workplace cloud services, delivering secure, scalable infrastructure. Achieved improved user experience, strengthened security posture, and **£1m savings** - all with zero service disruption.

Cloud ITSM Migration (ServiceNow SaaS)
Successfully migrated from a legacy ITSM tool to a modern, cloud-based ServiceNow platform. Delivered scalable, robust service operations, strengthened governance, and enabled faster, more consistent digital service delivery across the organisation.

Cloud-Native Data Pipelines (Azure Integration)
Built automated Azure Data Factory pipelines into a Lakehouse architecture, using Bronze/Silver/Gold layers and Delta with CI/CD. Delivered secure daily refreshes, improved data quality, lower manual effort, and more efficient reporting.
